GBH American Hospital, a medical revolution

Dr. Dev Kothari

RH Team

Udaipur In the name of hospitals and medical facilities, not long ago, we only knew about the general hospital at Chetak Circle. And no doubt that helm of medical facilities was well equipped and prepared to cater and handle any kind of medical situation. There were umpteen small and large nursing homes but they were limited to small and limited cures. GBH American then was one of those medical establishments that allowed Udaipurites to get the similar treatment in a huge setup.

GBH American Hospital is a dream come true for the founder Dr Kirti Kumar Jain (CMD). GBH American Hospital is NABH Accredited and ISO 9001:2008 Certified State-of-the-Art

Multi Super Specialty Hospital, extending its services to the people of Rajasthan. "It has been established with a vision to raise the bar of Indian health care to the highest international standards. GBH American Hospital provides state-of-the-art evidence-based health-care with focus on personal attention, doctor accountability and choice of informed decision. With established systems and procedures in place, the Hospital offers the world's latest medical technology and treatment modalities to the patients," says the CMD.

The hospital also helped people to stay in Udaipur and still get complex and hitherto unavailable treatments for which they had to go the cities like Ahmedabad, Mumbai, or Delhi. Techno-

logical superiority forms the backbone for the human medical resources to deliver their services efficiently and safely. GBH American Hospital is well equipped with departments with the latest, state-of-the-art medical and surgical equipments to deliver the best and safest medical care to its patients. "Our medical team consist of group of skilled doctors who are excel in their clinical and surgical fields. The team will be made up of doctors who are highly respected in their fields for their expertise and know-how. We assure, their commitment to patients will be unmatched along with their dedication to treat them with utmost care and give them the right cost-effective treatment," adds Dr. Jain.

Services at GBH

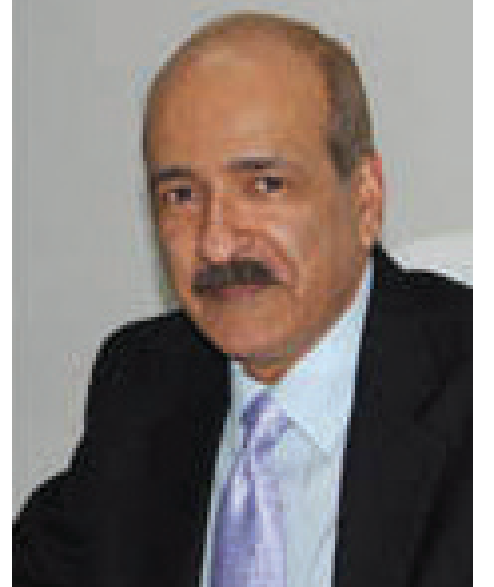

GBH American Hospital offers world class care in clean, hygienic, and comfortable setup. Centrally air-conditioned In-Patient rooms with central oxygen and suction facility, in-house dietary department. Separate Stroke Unit, Neurology, Cardiac, Surgical & Medical ICU with high end multipara monitors, cardiac markers, ventilators, web viewer and other intensive care devices and equipments. Economy Semi-Deluxe Deluxe Twin Sharing Executive Deluxe Intensive Care Units Pediatric Wards HDU NICU PICU.

The educational wing of the hospital

also offers a series of workshops and conferences aims to keep its medical and para-medical staff upgraded with the latest in medical field knowledge and trends. Medical emergencies normally suffer a lot due to availability of liquid cash with the patient and their families. and to cope up with that demand, insurance agencies have come up with a model in which cashless settlement can be done. Cashless Hospitalization means, the insurance company from which you have taken the health insurance will bear the cost of treatment either fully or partially on your behalf. Cashless facility is provided through health insurance policies. An Insured person can obtain admission and go through the treatment without paying. (Third Party Administrator TPA) Hospital is only the facility provider, it has no power to grant approval or disapproval for any cashless hospitalization. There are few rules and regulations decided by the IRDA (Insurance Regulatory and Development Authority) for availing the cashless hospitalization facility.

Cashless facility of hospitalization at GBH American Hospital

"We at GBH-American Hospital have a separate help desk for cashless hospitalization. You have to show and submit a copy of Insurance ID card issued by the health insurance company. Fill the

pre-authorization form which relate to the TPA. This form has two section one has to be filled by you and other section by the doctor who will treat the patient. Submit the form at help desk. Help desk personnel will fax this form to the TPA for taking approval after checking the complete form, and inform you after receiving the approval from TPA" says Dev Kothari, the managing director. GBH also offers the Linear Accelerator (Radiation Machine) with maximum number of power sources in South Rajasthan under guidance of Hemato-oncologist and philanthropist Dr Keerti K Jain.

Udaipur to be smoke free city...

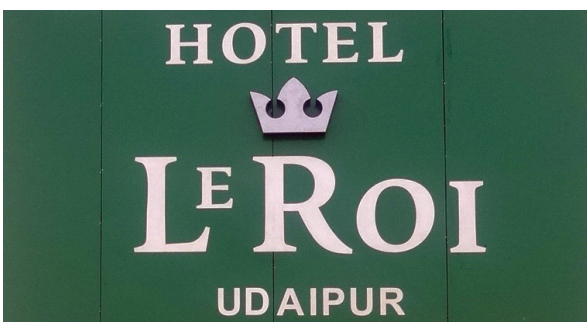

RH Team

What suits Udaipur is pure air and clean ambiance. Well, the enemies of own health and that of others, who smoke day in and say out actually do an adverse job by exhaling pernicious smoke from their nostrils. A tobacco control committee is organizing a workshop in this regard in the collectorate auditorium and district collector along with medical officers and members of this tobacco committee will announce the city as a tobacco free zone.

In this workshop, details of the tasks done with respect to cigarette, tobacco, and other such eatables will be presented. Udaipur school of social work has issued compliance guidelines after researching on the patterns and guidelines from the World Health Organizations. Tasks will be distributed as per sections 4, 5, 6, and 7.

Luxury outside Railway Station- LE ROI

RH Team

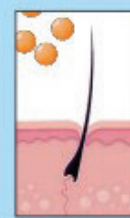

Railway is still the most preferred medium of reaching Udaipur despite the disconnected route to Ahmedabad. Now most of the tourists who come without much plans find it very difficult to find a suitable place to stay. Now, the hotel LE ROI will be an answer to this problem up to some extent. LE ROI is now operational at the multi functional complex in the vicinity of the Railway Station. The hotel is offering Silver & Golden Premium rooms with private balcony, air-conditioned room, double and twin beds options, LED tv, herbal toilets, and many more useful facilities.

- 1- Hair-Fall Reduction
