## Marriages are made in heaven, divorces are made on papers

**Ruti sodhi /** Human relations are most difficult to handle. I've heard somewhere in my childhood that marriages are made in heaven but when I grew old my belief changed. Now I know that divorces are made on papers and no God can save human relationships these days. Misunderstanding between husbands and wives are as old as history itself.

Illness is not only physical but when we start thinking emotionally we start becoming mentally ill. Pointless conflicts lead such relationships to hell. I met some married men in past few weeks who literally demanded me to write on their problem which they are facing in their homes. They scolded me for writing only for women. This time I have decided to raise this issue. Some husbands are really facing mental problems these days. Wives love their husbands but after few years of marriage they become insecure for one or the other reasons and stop giving space to their husbands. I've no right to blame on all females but there is some truth behind this issue.

I've talked to some males and tried to find out the truth. Trust me it was shocking. Some males are suppressed due to over possessiveness of their wives. This is one of the main reasons why marriages are breaking these days. Insecurities are genuine I must say but when it becomes part of daily routine, males start feeling suffocated. Trust and faith are two words but they strengthen our relationships. It's really important to realize the pain of faithful husbands which are rare species these days. Females face many problems in maintaining relationships so as males. They equally face troubles. Their mothers and wives both are important for them but both keep dragging them in domestic fights.

Males are generally compared to lions that have no right to shed tears. Males cannot express emotions and sometimes they find it difficult to share these problems with their close friends too. Some females put false charges on their husbands and family members for demanding dowry. Many males are facing these troubles but they have no idea where to

go. Law is not in their favor. It's really important to understand their pain and sufferings. Marriage is a beautiful bond.

No one should feel inferior. Relationships should be maintained without fear. Try to understand the pressure and problems of a male. If they won't get peace they can also be damaged like a female. We can win hearts with love and selfishness can kill any relationship. My opinion is not important here. Marriages are not made to break humanity; rather marriages are made to give support in each and every aspect of life. Males and females are partners and together they can win any race. Give each other space, confidence and compassion. Life is beautiful, enjoy each and every moment without thinking so much. Love can win any battle. No relation can survive without love and trust. Do not give importance to jealousy in your heart after all males are lovers and according to world famous psychologist Dr. Brian Weiss only love is real. Make special bond with your lovers and enjoy the purity of love with your partners.
