

Lingual thyroid cancer Operated
Udaipur : A very complex lingual thyroid cancer came to light in Geetanjali Hospital, only 52 cases have been registered so far in history worldwide, and now the 53rd case was successful in Gitanjali Hospital, and now it would be possible to treat diseases like cancer at Gitanjali. This case was made successful by Gitanjali's cancer surgeon Dr Subrat Das, Dr Devendra Jain and Dr Sachendra. Cancer surgeon Dr S Das said that Udaipur's resident 40 year old patient Bindu (name changed) Udaipur resident (name changed) was distressed for the past 5 years because of thyroid lingual cancer. She had difficulty in breathing and swallowing, and at the back of the tongue 4 * 5 cm and 10 cm on either side of the neck lump was cancerous, and despite the state because he did not get treatment elsewhere Ahmedabad and Mumbai the doctors told her the cancer had high-risk surgery, which left her with no hope. Due to the disease, Dr Das opted for mandibular swing approach (open jaws lump removal) by 5 hours of speech in open thyroid prostate cancer surgery and now the patient is healthy. The patient has now been asked to radioiodine bid and now the patient is normal and there is no problem in swallowing. The patient recovered and wants to live where it had left her, but now she has the desire to live longer.

Annual Group Meeting of All India Coordinated at MPUAT

Udaipur : The Annual Group Meeting of All India Coordinated Research Project on Ergonomics and Safety in Agriculture was held at its Udaipur centre at MPUAT, Udaipur on 27th and 28th November 2015. The programme was chaired by the Assistant Director General (Engg.), ICAR, New Delhi and Hon'ble Vice Chancellor, MPUAT, Udaipur Prof. P. K. Dashora was the Chief Guest. Prof. Dashora stressed upon the well being of agricultural workers during his address and informed the house that our culture has mentioned it in the early age in verse "Sarve bhavantu sukhin sarve santu niramaya" in Kalyan Mantra.

Dr. K. K. Singh, Assistant Director General (Engg.), ICAR, New Delhi has informed the house that ICAR is running a number of Projects for the benefit of farmers and this project is also meeting the requirements of farmers by providing the refined tools to the farmers and also working for their safety during agricultural activities. Dr. C. R. Mehta, Project Coordinator of the Project gave detail presentation of the work done at different centres of the project in the country. The meeting was attended by about 50 scientists from different parts of the country especially from Arunachal Pradesh, Sikkim, West Bengal, Odisha, Tamil Nadu,

Maharashtra, Madhya Pradesh, Punjab Himachal Pradesh, Rajasthan and Delhi. Director Research, MPUAT, Udaipur stressed upon the need based adoptive research to be taken up as per the requirements of the farmers based on the feedback. The dean of the College Dr. B. P. Nandwana mentioned that CTAE is one of the leading Agricultural Engineering College of the country and is working to solve the dust and heat stress problem during agricultural activities. A number of solutions to the farmers' problem were presented by the scientists during the meeting. The safe tractor trailer for minimization of acci-

dents, improved head gear for working under open sun, improved ladder for orange harvesting, chaff cutter with safety device, manual paddy transplanter and pedal operated maize dehusker sheller were the important recommendations among them. An all India survey on agricultural accidents was also conducted to find out the reasons of accidents and identification of accident prone agricultural machines along with the details of accidents victims. Tractor with trailer, thresher and chaff cutter emerged as the most accident prone machines while snake bite during agricultural operations was also one of

the major reasons of agricultural accidents. The Chief Guest of Valedictory Programme Deputy Director General (Education), ICAR, New Delhi Dr. N. S. Rathore appreciated the work done by the scientists in the project and called them to work in association and at multi location rather than working individually. This will help in sharing the knowledge and shall result in a solution which will be helpful to resolve the national issue of farmers well being. Dr. Abhay Mehta Project In-charge of Udaipur convened the programme and also proposed the vote of thanks.

Denmark to support Udaipur become 'Smart city'

Udaipur : The Danish Government may share technical support and expertise to help Udaipur in its Smart City plan. In a meeting held at the collectorate on Wednesday, the Danish Ambassador Peter Taksoe Jensen and councillor Nis Galert discussed with Dr Manjit Singh, Principal Secretary Local Self Government the prospects of a collaboration towards a common goal. The delegates said that since Udaipur has some striking similarities with few of the Danish cities, therefore it could benefit from the technical expertise the latter has.

"Denmark is in a unique position when it comes to realizing the Smart City vision. The two largest cities in Denmark, the Copenhagen Aarhus have both set ambitious goals to become CO2 neutral by 2025 and 2030, respectively. The cities are role models when it comes to creating a sustainable and liveable city that is appealing to its inhabitants" Jensen said. Denmark has leading industry within the market for several key technologies needed in the Smart City, such as smart grid, wind turbines, and smart building materials. The digital infrastructure of Danish society is very well developed, and the government together with the regions and municipalities are working strategically on the digitalization of society.

This will enable further digital communication between citizens, private companies and the public authorities. Municipalities and government agencies are working systematically to make their data publicly available for the benefit of the private sector, which can use this information

to develop new and innovative smart technologies, the delegates explained. Collector Rohit Gupta gave details of the progress of documentation on the smart city proposal draft. Mayor Chandra Singh Kothari, NAGARNIGAM commissioners Siddharth Sihag and Himmat Singh Barhet, ADM city OP Bunkar also participated in the discussion.

5000-year old Ahar remains in Chittorgarh enthrall archaeologists

Udaipur : Archaeologists are enthralled at the discovery of a multi cultural site near Moola Mata temple at Kapasan town in Chittorgarh. Of the remains found here in three different layers, one beneath the other, the oldest one identified dates back to the 5000-year old Ahar culture while the other two are believed to fall somewhere around between 2500 and 1000 years respectively. This is the 116th site found so far of the Ahar civilization whose remains is believed to be sprawled in a vast area across Rajasthan, Madhya Pradesh and Gujarat. Other remains indicate civilizations of the historic and medieval age. " We have asked for the details of the land revenue records from the Patwar office. A proposal for preservation and excavation of the site would be soon send to the Archaeology department" said Mubarik Hussain, the Superintendent of Ahar Museum. The excavation work which was ordered

by the municipal office has been called off fearing harm to the delicate antique objects buried underground. Archaeologists have found typical white painted black and red ware pottery pieces that is known as the peculiar and distinct feature of the Ahar civilization. The chemical analysis of the discovered material is expected to bring important revelations on how the culture flourished in different periods, experts claim.

The discovery came when an official of the Nagar Palika happened to visit the temple recently. He was informed by the residents of remains seen on the mound thus suggesting a possibility of some ancient civilization unearthed. Taking the clue the officer ordered excavation at the site few days back and what came out stunned everyone. Pillars, pieces of earthen pots, brick walls, broken pieces of stone structures were discovered from the site.

" It is a huge mound which roughly measures 250m north-south and 150m east-west. Remains of Ahar culture are superimposed by a very thick cultural deposit of Historic and Medieval phase" informed Prof Jeevan Singh Kharakwal, Director Sahitya Sansthan of Rajasthan Vidyapeeth University. The total cultural deposit is about 10m thick. " We visited the site since a few members of a medieval temple got exposed while digging for soil to level the ground. The local villagers are making a shrine of Moolamata on top of this mound. Our close examination thus revealed that it is a multicultural site. There are a few well known Ahar culture sites such as Gilund, Umand, Rawalia in this area located about 20, 8 and 11 kms respectively from Moolamata" Kharakwal said. The exploration was carried out jointly by a team of Sahitya Sansthan, Rajasthan Vidyapeeth, Udaipur and Ahar museum, Udaipur.

Let's Go Picnic : Flowers, Trees, Slides and Swings all around me makes me enjoy

To take the Wittians out from their mundane routine, the children of pre-Primary were taken for a picnic to the Wolkem Garden. They enjoyed the short trip singing songs and rhymes, running around in the garden and watching the colourful flowers. They enjoyed playing on the swings. On their way back to school they were excited to see Fateh Sagar, one of the most beautiful place of Lake City. Children enjoyed the fun filled day.
