Trustworthy coaching institute Akash now in Udaipur

Udaipur : Educational Services PvtLtd inaugurated and launched a new centre for India's best medical and engineering coaching provider Akash Institute today in Udaipur. It was inaugurated by company's president JC Chaudhary. Like its other centers in the country, more than 126 medical and engineering students in Udaipur successfully pass the entrance examinations of both the national level aimed at helping the center has been established.

On this occasion a press meeting, Chaudhary said that Akash Institute will also provide coaching for, apart from medical and engineering coaching, NTSE on a foundation level and coaching for Olympiad for eighth, ninth and tenth classes. These students, along with school board examinations will be well prepared for these NTSE and Olympiads as well as for various competitive examinations will

also be prepared. The purpose of this center in addition to the preparation of national medical and engi-

neering, the Board is to assist students to prepare for exams. Rajasthan State Board in conjunction with the State Board of batch-specific study materials will be provided to students so they can score well in Rajasthan Board XII as well as entrance exams such AIPMT, can achieve excellent results in JEE. In this center, there is ESPL's newAkash iTutor Labwhere a student can watch medical, engineering and foundation faculties' recorded lecture. It helps students to cover missed topics and can also see the lecture again. Special doubt classes, sessions of all subjects for weak student, scholar batch for top students, accommodating and helpful admin staff, comprehensive studies and exhaustive test series and evaluation system sky special features of the system will now be available for students of Udaipur.

Hybrid - a green crusade

Udaipur : As the world is progressing towards a cleaner and greener tomorrow, the automotive industry too is focusing on reducing environmental impact for years and is waking up to the challenge. The industry is embracing modern technology in creating exceptional experiences while keeping in mind a green future which is the need of the hour. As a responsible Corporate, Toyota Kirloskar Motor is leading the way by striving to find alternative sources of energy, and also minimizing the usage of existing exhaustibleresources. Hybrid technology isthe answer to what the next generation is looking for. Nothing short of an engineering brilliance it promises to reduce pollution while elevating the driving experience to a whole new level.

Hybrid technology is a combinationthat leverages existing source and an alternated source of energy in the car which helpsthe vehicle with better efficiency. A hybrid car uses more than one source of energy based on the concept of minimizing the overall usage of nat-

ural resources. For example-an electric motor is used to start the car and provides a smooth low speed driving; the gasoline engine on the other hand provides excellent results in the high-speed range. With continuous research and development, a suitable distribution in the power sources has been achieved. The prima facie advantage lies in the fact that electric system runs the car and cuts fuel consumption when power from the gasolineengine is not needed. As the fuel consumption is reduced by a great extent the car renders a perfect example of a four wheeler that is environment friendly. Studies suggest that hybrid cars can help in reducing the percentage of smog by 90% while keeping the consumption of gasoline or diesel much lesser than the non-hybrid cars.*

For a bit of context, Toyota calculates that as of July 31, its hybrid vehicles have resulted in approximately 58 million fewer tons2 of CO_2 emissions than would have been emitted by gasoline-powered vehicles of similar size and driving per-
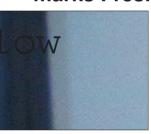

formance. Toyota also estimates that its hybrid vehicles have saved approximately 22 million kiloliters of gasoline compared to the amount used by gasoline-powered vehicles of similar sizes. In the Indian context 58 million fewer tons of CO_2 emissions is about 3.55% of total CO_2 emissions in India. 22 million kiloliters of gasoline saved compared to the amount used by gasoline-powered vehicles of similar sizes is around 13.3% of India's annual Oil import.

ToyotaKirloskar Motor is riding the highest waves of this technological modernization-in the automobile industry with its trend setting brands like Prius and Camry Hybrid. As a responsible corporate entity and catching the pulse of tomorrow, Toyota launched the Camry Hybrid in India in the year 2013. The Camry Hybrid, India's first locally manufactured hybrid is manufactured atToyota Kirloskar Motor's second plant located in Bidadi, near Bangalore in Karnataka. Globally, India isthe 9th country /region to manufacture Toyota hybrid vehicles.

Investigate Educational institute run by religion, social organization & societies NGOs - Belan Brigade

Ludhiana - The social organizations in free India came forward to supplement the effort of the Govt. to educate the citizens of the country however with the passage of time these organizations has left the basic objectives of this mission.

Now most of these organizations have become business center to earn profits. Especially CBSE and ICSE affiliated schools has become the profit earning business entrepreneur. These schools are not charging hefty fees but also force the parents of the students to buy stationary and school uniforms at very high rates. Lacs of rupees are extorted from the parents in the name if admission fees every year brilliant students who cannot effort these admission fees are deprived of education in a good school. Anita Sharma, National President, Belan Brigade demands that loot of such school run by social and business organizations by forming NGOs or societies and affiliated by CBSE & ICSE shall be debarred unless such institutes serve the societies and run on prescription of no profit no loss.

Organized Alumni Meet 'Yaadein-91'

Udaipur : 1991 pass out batch of St.Paul organized 'YAADEIN - 91? -to foster a spirit of unity, to promote the general welfare of the institution and to thank the teachers and staff.

Almost a week long nostalgic series of festivities has already started on 22nd of December, with a revisit to the alma mater, to invite the teachers and staff. On this occasion, the ex-students joined and participated in the school

assembly, to relive the golden memories of their school days. Two huge flags depicting the '91 Alumni Logo & a list of Success Mantras were unfurled. An interactive session was held between the ex-students and present students to provide them some guidance in achieving their career goals, to become a better citizen and add to the glory of the St. Paulian clan. As a token of love towards the younger generation, some gifts and

sweets were distributed to the whole school. The event provides an opportunity for the former students to network among themselves and their families. The focus of the Alumni is also to collaborate and take voluntary support from its former students, financial support for deserving students, educational course material support, mentoring support for current students in pursuing their interested career path etc.

Governor Kalyan Singh attends 9th Convocation Ceremony of MPUAT

Udaipur On 23rd December, the pass out students of MPUAT received their degrees from Governor Kalyan Singh at the 9th Convocation Ceremony held at Vivekanand Auditorium. IIHMR University conducts national workshop on Scholarly Writing, Reference Management and

Jaipur : Information and Communication Technology (ICT) has changed the traditional methods of library activities and services providing new dimensions for teaching, learning and research in higher educational institutions today. On account of the same, India's globally recognized and leading healthcare research institutions, IIHMR University commenced its two day long National workshop on Scholarly Writing, Reference Management and Deterring Plagiarism today. The National Workshop commenced today (21st December, 2015) and concludes on 22nd December, 2015. The national workshop on Scholarly Writing, Reference Management and Deterring Plagiarism was attended by 40 candidates who were LIS professionals, academicians, research scholars from all disciplines and students.

Speaking about the Workshop Dr. Ashok Kaushik, DeanAcademics and StudentAffairs said, "Libraries are under pressure to provide quick services to its patrons to meet their requirements. Therefore, Libraries and Librarians need to adopt latest ICT tools to manage the libraries effectively and efficiently.

Perceptions and expectations of the scholars have changed due to change and advancement of ICT in the libraries. Libraries are also considered as social place where users not only can study or access information but also can perform other activities like group projects, cyber space, community space etc. The aim of any educational institute is to uphold the quality of education, research and schol-

arly communication. With the advent of sources of information from the digital world, the evaluation of academic writing has become a major challenge for the faculty community. As we are aware, authenticity, honesty and quality adherence in academic writing bring academic integrity. Apart from evaluating the students and researchers for skills, knowledge, and critical thinking talents in this information age, evaluating them for the academic integrity to prepare them to become responsible, contributing citizens is a real challenge. Also, leading journals take special care to ensure that this integrity is maintained."

The workshop has been conceptualized

to introduce the different dimensions of academic integrity.

Prof. R.L. Raina, Vice Chancellor at JK Lakshmipat Unveristy said, "I am delighted to be associated with IIHMR University and also deliver sessions for this National Seminar. Plagiarism is considered as a form of misconduct in scholarly communications. You, as a researcher, must have heard about it; or you might know what it is. However, there exists ambiguity about it in academic community. The major objective of the workshop is to develop an understanding of Plagiarism and how to avoid it, to understand the different styles of referencing, to understand the

use of Mendeley or other reference management software in managing references, to develop and understanding of citation and bibliographies while writing, to understand the publishing process in science and technological journals, to demonstrate the use of citation database, to discuss the issues related to plagiarism." Dr. Sanjay Kataria, University Librarian, JP Institute of Information Technology said, "This workshop is the first of it's kind in Rajasthan. The workshop aims to sensitize the participants on Writing and publishing scientific papers, 'Issues related to Plagiarism' and how the power of reference manager can be used in their research activities. The focus of the workshop is to provide hands-on training on Reference Management tools. The workshop aims to address questions on plagiarism such as, when does plagiarism occur? Is there any established percentage to determine when plagiarism has taken place? Is there a rule of thumb to determine plagiarism? Are there different types of it? What may be the consequences if plagiarism is detected? How to avoid it? "The IIHMR University has a spacious and well-equipped Library under the name Dr. D.A. Henderson Library and Documentation Centre. The Library is being run according to an open access system. The objective of the library is to provide its user, articles or material on current topics or affairs in minimum amount of time most effectively and to provide users with accurate information enabling the IIHMR University to achieve excellence in teaching, learning, research, and community services.
