There will be many other attractions as well.

Hindustan Zinc that completes its 50 years of existence on 10th January 2016, is India's only the world's leading integrated zinc-lead-silver producer

HZL Set to Invest : 8000 Crore Beginning Golden Jubilee

Udaipur : As Hindustan Zinc, a Vedanta Group company in Zinc-Lead-Silver business celebrates its Golden Jubilee, completing 50 years of its existence; the company is all set for its next phase of expansion of its mining and smelting operations with an investment of Rs.8000 crore.

Hindustan Zinc is looking to expand its all operations in a time-frame of 3-5 years, taking current ore production levels of 9.36 MTPA to 14.00 MTPA and finished metal production levels from 0.85 MTPA to 1.10 MTPA.

The Company has its mines located in Agucha, Sindesar Khurd, Zawar, Rajpura Dariba, and Kayad, all in Rajasthan. The smelters are located in Dariba, Chanderiya and Debari, also in Rajasthan.

Hindustan Zinc which was formed under an Act of Parliament on 10th January 1966 is India's only and the world's leading integrated zinc-lead-silver producing company.

Anil Agarwal, the Chairman of

Vedanta Group, has expressed his happiness towards providing zinc sufficiency to India. "When we acquired Hindustan Zinc as part of Government disinvestment program in 2002, our focus was to make India self-sufficient in zinc. We are very proud that by adopting latest environment friendly technology, large investment in capacity expansions and continuous exploration, Hindustan Zinc is able to increase the production five-fold and yet have reserves for another 30 years", he said. The turning point came when in the

year 2002, under the disinvestment program by the government, Hindustan Zinc was acquired by Sterlite. Since then, the company has grown multi-fold. The metal production capacity is 1 million tonne in the year today from about 200,000 tonne in 2002. The mine production capacity has also increased to 10.25 million tonne today from 3.45 million tonne in 2002.

The reserves and resources, which were 143.7 million tonnes in the year 2002 today stand at 375.1 million tonne after consuming reserves for

about 14 years. The philosophy of the company on exploration has been to add equal reserve for every tonne of ore mined.

The investment of Rs. 12,000 crore in the past years have brought many changes in not just asset optimization but also building new facilities into the business to give value to the shareholders. At the time of disinvestment, Hindustan Zinc did not have captive power generation or wind energy farms. Today the company produces 474 MW of captive thermal power and 274 MW of wind energy.

The turnover of the company has also seen a turn-around, from mere Rs. 1,200 crore in the year 2002 to more than Rs. 14,500 crore in the year 2014-15. The profit too has jumped from just Rs. 68 crore in the year 2002 to Rs. 8,178 crore in the year 2014-15.

The contribution to the exchequer has also seen significant change, which increased from Rs. 364 crore in the year 2002 to more than Rs. 5,000

crore in 2014-15.

"Though the zinc mining in India dates back to over 2500 years old, and the retorts of ancient mining can still be seen at Zawar, about 45 km from Udaipur; the zinc as a metal has been not much known or utilized in India. We are still exploring the new areas where zinc could add value to consumers and also add in the GDP of the country. We are exploring the possibilities of galvanizing of car bodies and structures to increase their life-span accordingly", said Sunil Duggal, the Chief Executive Officer of Hindustan Zinc.

Hindustan Zinc is also looking to set-up a new Fertilizer Plant with a capacity to manufacture 0.5 MTPA of Di-Ammonium Phosphate in Debari in district Udaipur with an estimated investment of Rs. 1350 crores.

As the company celebrates its Golden Jubilee year, it is all set to invest another Rs. 8000 crore in the coming 3-5 years on expansions of its mines and smelting operations.

Reducing percentage in researches is matter to worry: Prof. Sharma

Udaipur : "The need is to adopt new research update of International basis," these were the opinion of Professor BP Sharma who was addressing a two-day national workshop held in the Vidyapeeth Udaipur.

He expressed his concern over reducing percentage of research. He said that we should get aware about maintaining the quality and trust value of our researches. "India is going to be a world leader in intellectual property and we must pay attention towards this in time," he added.

the workshop was organized

jointly by Lokmanya Tilak Shikshak Prashikshan Mahavidyalaya and CTE project of Human resource Development Ministry. Professor BP Sharma was speaking as chief guest at the inauguration of the workshop.

He called upon researchers to be positive. He said that the researcher should be aimful in their work.

Special guest Professor MP Sharma said that we have geographical challenge and the world is constantly changing. He believed that we are still much behind and to compete, we must pay attention towards the quality of teacher education.

Models walked the ramp for Smart City

Udaipur : Models displaying western and ethnic bridal and groom wears walked on the ramp in a Fashion Show organized at UMC Auditorium on Tuesday 5th January. The event was organized by Lakecity Beauty Club in association with Sen Shore Kalakar Mandal and Hair and Beauty Organization's Rajasthan Chapter. 37 models under the direction of choreographer Rajesh Sharma of Creation Group walked on the ramp and exhibit fashion and creative haircut, style, hair colour, hair tattoo, western bridal makeup, bride groom makeup etc.

International Cambridge Examinations

Udaipur : Rockwoods High School is now awarded Cambridge International School status by Cambridge International Examinations. it is now approved to offer Cambridge programmes and qualifications, including Cambridge Primary and Cambridge Secondary 1. However, CBSE board will also remain an option for students who want to pursue it.

Michael O'Sullivan, Chief Executive of Cambridge International Examinations, said "We are delighted to announce that Rockwoods High School has joined our global community of Cambridge schools. We look forward to a long and productive relationship which will be of great benefit to learners throughout the region."

Cambridge programmes and qualifications are recognized and valued by universities and employers around the world. Cambridge helps schools deliver the best education possible by providing comprehensive support, including teacher training, classroom resources and membership of a global learning community.

Cambridge programmes and qualifications are taught in more than 10 000 schools in over 160 countries.

"From infrastructural facilities to teaching methodologies, CIE standards are very different, they are not just designed with international standard but also with novel learning approach. Here students are taught to focus on "Why and How" which makes them think and develop an informed

curiosity" said Vikramjeet Singh of Rockwoods High School.

"Following strict criteria, the faculties also get special training to adapt CIE method of teaching; every class will not have more than 25 students. "CIE emphasize on nurturing lives of students without pressurizing them, the academic curriculum is designed in a way that student will enjoy learning and his enthusiasm will be escalated throughout the course" says Vikramjeet.

Ashish Bhatnagar, Dean at Rockwoods High School who has worked with CIE schools in leadership positions for over 15 years in Saudi Arabia, India and South-central African country Malawi This programme is widely recognized by Indian Universities and AIU."
