Manan "Lady of love for unloved"

Manan Chaturvedi, a common name in the uncommon world, a sole Amazon for wretched children, miserable and succumb. She is the proud mother of 127 adopted children. An artist, designer, social worker and now recognises as chairperson of Rajasthan State Commission for Protection of Child Rights. Her enormous love, affection for children made her to left fashion designing career and become a child rights activist.

The Journey was started when first she saw an 8 years old girl collecting garbage at Sindh Camp Bus stand at Jaipur. The child was in a terrible condition not wearing full clothes even. The sight did shake her soul completely and melted her heart for divested children. Manan immediately decided to take this issue seriously. Later on, she formed an organization named as Surman Sansthan.

It is home to the orphan and destitute children of society. Initially, Manan started with few children but the number got increased and today she has 127 children at Surman. These all children live with her three biological kids at the same place, celebrate every festival with Manan.

When asking about the future of these children she reverts "There future is with me and my future is also with them. These are my children once they come here there future become my responsibility."

Recently, she developed a mobile app named as Manan App and launched it during Children Day Week in Udaipur to support children in difficulty. Any children in any difficult from anywhere can and share his or her message with

Manan. She also took a pelage to intervene for frequent suicide cases of students in State, especially in Kota. Kota, an education hub, a city famous for its result oriented coaching education across India. Every year thousands of children

come to get select and reach to their dream Institute. But only a few could make it possible. Disappointed children took horrible decision to end their life. Got panic with it, she planned to launch a campaign on 27th Nov. 2016 first

time in the entire state especially focused for children of coaching institute at Kota. It will be a live painting show for 24 hours and whatever money collected from the charity of the show will be used for betterment to children in need. The initiative is being praised in the entire state and nation wide as well. Such campaign are needed in indeed in true sense for our children who take wrong decision in distress. The movement is just a start to scratch the hidden issues of children in society. Manan has planned to take this movement across nation and involve maximum people in it.

Anonymous properties to be raided

Udaipur: After turning currency of 500 and 1000 into waste paper to hit hard at black money holders and corrupts, the central government now has implemented the act to check the anonymous realty. The act is an amendment of anonymous property act of 1988. These were the views of chief guest Abimanyu Singh who was speaking in a talk show called Anonymous Transactions. It was organized by Rotary Club at Rotary Bajaj Bhawan. He said that anonymous properties are used to consume the money earned through wrong means and corruptions.

The impact of declaration of PM Narendra Modi's speech on 8th November 2016 has been and is going to be massive on Indian economy and society in many ways. On 09/11/2016(our own 9/11), a lot of things changed but mass-

Impact of demonetization

es of Bharat are happier than that of India as they have little to hide.

Demonetization has to be done abruptly and should be considered as creative disruption for the economy. Hopefully, it should force many to work in white and would force them to become part of tax paying individual/organization. Hopefully, this is going to be a great initiative for the country in long term but in short term (at least 1-2 quarter), economy is going to be affected adversely due to abrupt shortage of liquidity. Moreover, short term will be how short will

depend on further follow up actions taken by the Government.

Further, implementation should have been better executed to ensure minimum pain to the masses. Shortage of currency with banks, defunct/non-availability of cash in ATM have created a lot of problem in the fortnight after demonetization. The images on few television are troubling.

An elderly man crying helplessly for want of cash/medication, death of few persons while standing in queue for getting cash is certainly very disturbing. Even some guys are

reaching bank/ATM at mid night and waiting for cash at least for initial few days certainly not show arrangements in good light.

The Government and RBI should be very proactive to ensure that pain does not run too long and economy does not get too much adversely impacted. Demonetization might be helpful in breaking back of insurgent's and Naxal's funding. Even there will be huge impact on the big fishes of economy, who have millions and billions of rupees in cash. But, one must remember that demonetizing Rs. 500/Rs.

1000 currency, is not the all in one solution of the ills facing the economy black money, crime, insurgency etc, as is being discussed in many news channels.

Many of the big fishes have their a lot of black money is stashed in the form of real estate/ land (mostly benami) and gold. There need to be concerted effort to tackle all them. Further, generation of black money need also be stopped with serious effort. One major step can be transparency in political funding as this is a major reason of black money generation.
