## Post- Budget Quote by Jagdish Toshniwal

"I congratulate the Honorable Finance minister for presenting a very well growth driven budget for the people of India. About 70 lakh farming jobs were created this year. Taking this further the budget consists of certain measures for development of the rural sector like providing full MSP to farmers and increasing credit for agriculture activities at 11 lakh crores that would create enough surplus in the rural sector. Apart from above the govt is also keen on spending 14.34 lakh crore rupees on providing livelihood to rural sector. All these measures are likely to create good demand in rural sector that has a lot of potential for growth.

Wonder Cement appreciates government's move of building Eklavya schools worth 1 lakh crore, and believe in "padhega India tabhi to badega India."

We congratulate our Govt for becoming 2.5 trillion dollar economy and we as Wonder Cement share the same pride being a contributor to it. We support govt's expectations and would do our part. At the same time we expect the govt to include everyone in its big growth oriented projects such as Bharatmala, Affordable Housing Project and capital expenditure on Railways. I believe that they would make an equitable allocation of these projects amongst all players of industry.

As mentioned by our Finance minister that India has climbed up 42 places in ease of doing business, I take pride in congratulating them. It is their policies and growth oriented thinking which has led us at this stage.

Lastly, The current rate of GST on cement remains untouched in the current budget although we do hope that it will be taken up in the near future for rationalization. A cut in GST on cement would definitely lead to a positive impact on general public buying their dream homes."
