

Tourism is big industry in Udaipur

Udaipur, Vikram Shrikant Kirloskar, the non-executive director of Kirloskar Brothers Ltd, said that selling of products in the market for startups is a big challenge. Car-making in the automobile industry is engineering, but selling it is also a challenge for us, for startups, it is necessary for them to understand the needs of their customers and make them feel better from their product. To stay in the market, it is necessary to connect the customer with the product. In the conversation with media, he said that there is no plan to set up Rajasthan Industry.

He said Tourism is the biggest industry in Rajasthan due to natural beauty. In such a situation, the government and entrepreneurs should not compromise with the environment here.

As Mewar and in toto Rajasthan is rich in minerals Rajasthan may have more big industry, in mining but there is also a need to take care of the environment. In Rajasthan, the government trains labor according to the tourism industry. Many sectors can be developed according to the needs of the tourist, including hotel, spa, restaurant, food. Vikram Kirloskar suggested startups entrepreneurs that the policy of 'customer is right' in the service sector should strictly be followed. Youth should not ego or pride towards the customer. A startup is proud of your product, business, but do not boast. Always be courteous to the customer, even if he is stuck on something.

Says Hans Raj Choudhary

"In the age of globalization, the industries are facing new and tough challenges. In such a scenario, felicitating the industrialists is a great motivation for one and all. Like many other prime chambers of the country, UCCI will also set up new standards and examples on their foundation day. While large enterprises help the economy grow at a large scale, medium and small businesses also propel the financial situation towards greater heights. They also provide employment to people who in turn help the economy in many ways. This platform is a confluence of all such important people and this juncture will set up the layout of mutual development and growth, I believe.

Honoring The Excellence
