

The True Investment

When you invest in good things, returns are bound to be good. At times you get instant results while more than often you have to wait. But for those who have made investing in good things a habit, results don't matter. These are the people who believe in Nishkam Karma and do good and offer it to the God. They, in return, get a deep peace inside instantly and then also get results in the future.

Now, in our lives, what we have been told is that good thing have to be big in magnitude. You donate money, feed someone, help a blind cross the road, pay fees of your maid's children, donate your old clothes, return an ornament to back to the owner, and so on.

Of course, these are great deeds but you do not get an opportunity to perform such investments always. So, there are many ways with which you can continue with great deeds for the mankind and you too get rewarded more than often.

The frequency of you getting benefited in the present from your past good deeds is proportional to the frequency you committed good work in the past.

What you reap is what you sow can be realized in many small endeavors we take across the day. For example, if you flush the toilet after using it on a train, you are most likely to get a clean toilet when you step in to use it.

If you find it filthy, you must have left it so sometime in the past for someone else.

Similarly, if I get a lower berth in the train and I offer it to the senior citizen or a lady with an infant, I shall find similarly generous and kind youngster when I am old.

So, it is all about getting benefited from the past deeds of your self. This implies that you yourself write your destiny. For many cases you see around you every day, you can connect with your past actions. You dropped a student to the exam center when it was difficult for him to reach in time will surely result in similar help for you in the future.

The power is like money which is too slippery to hold in your hands. Today, if you are powerful, you are bound to be weak next time. And that cannot be changed. Now the way you behave in the times of your power will determine how you will get treated in the future in your weaker times.

So, you are not obliging anyone by helping them. All you do is pave a path of comfort for your future. So next time when you use public parking, make sure that your park your vehicle in the most proper way so that others can park as well. Next time, you will get your parking space even when its Saturday night.

LAND ROVER IS WORLDWIDE PARTNER OF RUGBY WORLD CUP 2019™ AS THE TROPHY TOURS INDIA

- The Webb Ellis Cup is visiting four cities as part of the Rugby World Cup 2019 Trophy Tour
- Land Rover is one of the partners of the 2019 Rugby World Cup that will be held from 20th September to 02 November 2019 in Japan
- Land Rover has proudly supported the sport for nearly two decades, from grassroot to the highest levels

Mumbai: The 2019 Rugby World Cup Trophy, the Webb Ellis Cup has reached India,

after a six month world tour. Having visited several countries across Europe and Asia, the Trophy has now made its way to Mumbai, via New Delhi and Agra and will head to Bhubaneswar before heading to Japan. Land Rover has been a proud partner of Rugby World Cup since 2011 and is once again a part of the world's leading rugby tournament for the 2019 edition as well.

Rohit Suri, President & Managing Director, Jaguar Land Rover India Ltd. (JLRIL), said: "We are extremely delighted to have the Rugby World Cup Trophy touring India. Land Rover's association with Rugby is bound by strong shared val-

ues and a rich heritage with the sport for nearly two decades."

Land Rover will be offering customers and fans from around the world the chance to get involved with Rugby World Cup 2019 – the world's third largest sporting event.

India is the eighth leg of the Rugby World Cup Trophy Tour, and will be visiting 18 countries, having begun in Uruguay in February and finally culminating in Japan in September 2019. The 2019 Rugby World Cup will be played from September 20 to November 2, 2019 with participation from 20 countries in 48 matches across 12 stadia in Japan.

Nestlé India Conducts Its Unique Soft Skill Enhancement Workshop N-Reach at CDFST Udaipur

Udaipur: In line with the commitment to encourage young talent through a comprehensive mix of experience and education-based initiative, Nestlé India conducted its unique skill enhancing programme, N-Reach, for students at College of Dairy & Food Science Technology (CDFST), Maharana Pratap University of Agriculture & Technology (MPUAR), Udaipur. The programme, N-REACH was a four-day workshop which is divided into two parts and focused on Leadership Development, Emotional Intelligence, Accountability and People Management. The par-

ticipating students were also given a case study at the end of the workshop and received certificates on completion of the training. Speaking at the closing ceremony, Mr. Suresh Narayanan, Chairman and Managing Director, Nestlé India said, "I always feel energized looking at youngsters and I am extremely grateful for the support we have received from Prof. Uma Shankar Sharma and the entire faculty at the University. My experience today has been positive and enriching. The talent that the students at CDFST have to offer is very impressive and I

wish them all the best for their future endeavours". Prof. Uma Shankar Sharma, Hon'ble Vice Chancellor, MPUAR, Udaipur commented, "Soft skills have always been an integral key to success and we are glad that N-REACH programme recognizes the importance of the same. We hope that our students get more of such opportunities in the near future". Mr. Lalit Kumar Murdia, Dean, CDFST further added, "N-REACH has been an inspiring experience for all the final year students and is sure that Nestlé India and CDFST's relationship is only going to grow stronger in the years to come."

N-REACH is aimed at enabling the final year students pursuing food technology to be more prepared in terms of the challenges which they will face daily on entering the professional world. It is specifically focussed on soft skill enhancement of the students to bring them a step closer to success. Nestlé India has also conducted this programme with National Dairy Research Institute at Karnal recently. The programme is conducted by experienced trainers which incorporates sessions facilitated by a mix of alumni of the institute and a team of external trainers.

Free Swimming Coaching For Government Schools

Udaipur: Free swimming classes for students of government schools have been started in Rajasthan Agriculture College. 25 students are being given free swimming lessons.

The step to impart free coaching was taken after the realisation that these students were interested in jumping into the pool but the family's financial condition prevented them from doing so. This is one of the main reasons why students of government schools could not participate in swimming despite the fact that the schools have a provision for swimming classes. Furthermore, government schools do not have a swimming pool of their own. Students from private schools can afford swimming classes; hence they get the opportunity of competing with others.

Physical Education Trainer Piyush Sukhwai took the initiative of training the students of government schools. He is imparting training to the students with the assistance of 2 other trainers free of cost. Students study in the first half of the day and attend swimming classes around 5 p.m. daily. He has contacted various government schools and requested them to send interested children for swimming classes. As of now, students of Government Fateh School, Guru Govind Singh School and school in RCA are attending swimming classes. 25 students are attending classes and if the results are encouraging, then the number of students will be increased.

Many students said that they had never seen a swimming pool before. Their parents couldn't afford swimming classes. Now that they have this opportunity, they will avail the benefit of coaching and prepare themselves for competitions. They expressed their gratitude towards Piyush Sukhwai for his kindness.

Go cashless will bring about ease of doing business

Mumbai: In a pro-Digital India move, the Indian Performing Right Society (IPRS) has gone cashless, by encouraging digital payments, for smooth, convenient and effective transactions. Under the new management, who has set a goal of making the IPRS a world class organisation, the introduction of digital payments is a step in that direction. With this cashless system of applying for a license, users can now simply log on to the IPRS website, fill in the application, and make the required payment online. Post this, the applicant will receive their license immediately via e-mail and SMS.

Commenting on this new development, Javed Akhtar, Chairman of the IPRS said- IPRS wants to ensure that purchasing of licenses by organiser for any event, big or small and anywhere in the country, can be done at the click of a mouse. This step will bring total transparency and ease of doing business with the Society to the benefit of everybody concerned; on the other hand, events organiser should have no excuse anymore for not obtaining the license required under the law. "As the only government authorised body in the country to administer rights, issue licenses and

collect royalties for authors, composers and publishers in respect of musical and literary works (lyrics), cashless payments will bring about ease of doing business."

This latest IPRS move is also perfectly aligned with the Government's vision for a Digital India. Says Rakesh Nigam, CEO of the IPRS: "We are committed to go all digital. It requires substantial investments by the Society over the medium term. But our top priority is to take out the friction from the licensing process: removing negotiations and cash payments from the system will increase efficiency and transparency, and save time and costs for everyone."

Students win Rajasthan Digifest 5.0 Green-A-Thon

Udaipur: Techno NJR students have made the City proud again! Student's Team Slick comprising of Kamlesh Kumar, Sachin Goyal, and Harshit Jaroli have won the first prize of Rs. 15 lacs in the event Green-A-Thon organized during Rajasthan Digifest 5.0 held at Bikaner from 25th to 27th July 2018. Chief Minister Vasundhara Raje gave the prizes to winners.

A technology carnival saw the desert city of Bikaner come alive with over 5,000 people that included students, developers, tech enthusiasts, employers, and startups participate in Rajasthan's fifth edition of DigiFest. A highlight of the three-day event was Hackathon 5.0 and Green-A-Thon which saw 3,500 participants from not just the state but all over India. The 36-hour coding and designing marathon witness over 800 teams from 20 cities, helped by 15 mentors. At the end of the first round of evaluation, 14 teams made it to the final and were then evaluated by a jury led by Mohandas Pai, Chairman of Manipal Global Education and Aarin Capital, and Nakul Saxena, Director of Public Policy at iSPIRIT.

Faculty Induction Programme at MLSU

Udaipur: A three-day FIP was held at Mohanlal Sukhadia University in order to orient the newly induction faculty. The programme was conducted as per the UGC quality mandate for faculty induction which will come into practice in October 2018. MLSU has taken proactive initiative and in doing so has become the first University to hold this programme two months earlier. The inaugural speech by Hon'ble Vice Chancellor, Prof. J.P. Sharma, heralded the dawn of new-age teaching practices by laying down expectations of Personal and Professional Excellence from the newly recruited team. Prof. G. Soral, Dean PG Studies and Dean UCCMS, conducted an invigorating session on the new Ph.D. Guidelines received from Raj Bhawan. He apprised the participants that the course work will now include three papers, one each on contemporary issues, review of literature and research methodology and ICT.

Varied sessions were hosted by senior Professors and Deans of the University comprising 'Roles and Responsibilities of Educators' by Dean of Law, Prof. Anand Paliwal; 'Promotion of Research' by Dean UCS, Prof. B.L. Ahuja; as well as a presentation on 'Impact of Internal and External Quality Assurance' by Chairperson Faculty of Social Sciences, Prof. Sanjay Lodha. Chairperson Faculty of Humanities, Prof. Seema Malik hosted a session on 'Research Ethics' and spoke about what constitutes plagiarism and how to avoid it. Prof. Anil Kothari's session on 'Financial Education' was welcomed by all and was followed by a very interactive session with the audience. Prof. Rajesh Kr. Dubey highlighted the New Frontiers of Higher Education in Rajasthan. He is heading the National Research Centre (NRC) for Biotechnology. MLSU is the only state university in Rajasthan selected to run an NRC, which is expected to commence operations from October 2018.

Each session was followed by an interactive session with the participants who gave constructive feedback. They wholeheartedly appreciated the efforts of Prof. Karunesh Saxena, Director IQAC, in putting together a programme of this magnitude. His session on 'New API Scheme 2018' was very relevant and informative. Prof. Raghuvir Singh from Manipal University, Jaipur held a session on 'Writing and Publishing Good Research Papers'. The focus of the programme was on encouraging quality learning, mentoring and research.

It left the audience enriched, enlightened and empowered. MLSU plans to host more such programmes under the mentorship of Prof. Saxena in the future.
