FATEHSAGAR LAKE DEEPENING PROJECT BY HINDUSTAN ZINC

A water sustainability initiative in association with Urban Improvement Trust (UIT) for our City of Lakes...

Udaipur: Sustainability has always been a core value of Hindustan Zinc, and water preservation has always been a priority considering that we are in the water-stressed state of Rajasthan.

Continuing its efforts towards conserving the environment and as part of its community service initiatives, the company in association with Urban Development Trust (UIT) has taken up the project of deepening the Fatehsagar Lake by desilting when it is dry. In this regard, an event was organized on today at Fatehsagar Lake, Rani Road,

Udaipur, Mrs. Anandhi - Collector & District Magistrate, Udaipur was Chief Guest of the program.

The desilting process will deepen the lake by increasing the catchment area that will allow trapping of more water in the rainy season, helping preserve water longer in years of weak monsoons. The company will be doing 2 - 2.5 lakh cubic meter of Desilting of Fatehsagar Lake.

During the event, Mrs. Anandhi - Collector & District Magistrate said, "We commend that Hindustan Zinc has come forward for this initiative that aims at increasing the catchment area of the Fatehsagar lake in short time. It would enable to upsurge the

water level of the lake. Saving water has always been a focus area for both Government and Hindustan Zinc, and we as a team have been able to turn this situation into an opportunity.

Desilting refers to the removal of earthy materials, fine sand, etc. carried by running water and deposited as a sediment. It refers to significant intervention for enhancing the capacity of the reservoir. The company is ensuring the use of appropriate equipment with good safety practices.

Mr. Amitabh Gupta - Director Commercial & CEO Fertilizer said, "Hindustan Zinc has always been conscious of the environment and has pio-

neered in adopting clean green technology in running its operations. We as a company are committed towards Sustainable Development, and with many such initiatives, we are always in the forefront in resonating the efforts of environment conservation."

Hindustan Zinc has already engaged an expert team to support this effort for long term preservation of water for the city residents. This month-long initiative in conjunction with UIT has commenced and will be completed before the onset of monsoon.

Mr. Laxman Shekhawat - Director Operations HZL mentioned "Since Fatehsagar Lake is the lifeline of Udaipur city tourism and also being a major

source of drinking water for the residents, it becomes imperative to contribute to its sustainable management. Such initiatives definitely helps in preserving water for longer years." Hindustan Zinc is spending approx. Rs 2 crores on this

project. Also present were Mr. Ujjwal Rathore - Secretary UIT, Mr. J.K. Upadhyay (IAS) - Director DMG, Mr. Tej Rajdan - President The Jheel Sanrakshan Samiti, Mr. Anil Mehta - The Jheel Sanrakshan

Samiti, Mr. K.C. Meena - Head Business Development & Corporate Affairs, Mrs. Kavita Singh - Chief Human Resources Officer, Mr. Sawayam Saurabh - Dy. CFO and Head Corporate Communication - Mr.

Pradhuman Solanki during the event.

The city of Udaipur was struggling to keep its world-famous lakes clean due to dumping of raw sewage into them over decades. Hindustan Zinc, while understanding the gravity of the problem took the initiative of setting-up Udaipur's first 20 million liters per day (MLD) Sewage Treatment Plant (STP) under public-private partnership model in conjunction with UIT. This initiative keeps the lakes clean and conserving fresh water.

Now Company is trebling its capacity to 60 MLD by adding more STPs, which will treat more than half of the sewage generated by the entire city.

Environment Activists Oppose Pruning of Trees and Construction Near Fateh Sagar Embankment

Udaipur: The world environment Day is being observed all over the world. The environment activists of Udaipur are worried about mindless felling of trees and construction of pedestals near the embankment of Fateh Sagar lake. It is surprising that

the district administration has turned a blind eye to the pruning of trees and constructing pedestals in a zone where all civil construction work is banned. The environment activists including Engineer G.P. Soni, Journalist Himmat Sethi, State committee member of

CPI(M)L Comrade Shankar Lal Chaudhary, Advocate Manna Ram Dangi, convenor of NGO Bhrashtachar Mukh Bharat Harish Suhalka, Narendra Joshi of JDS, trade union activist R.D. Mathur, artist Chinmay Dangi and Omprakash Agrawal collected at

Fatehsagar and raised slogans against illegal cutting of trees and construction of pedestals in the vicinity of Fatehsagar.

Later a memorandum was given to the district collector to stop pruning/cutting of trees.

BHAMLA FOUNDATION'S WORLD ENVIRONMENT DAY CELEBRATIONS 2019

Air pollution in India is a serious issue, ranking higher than smoking, high blood pressure, child and maternal malnutrition, and risk factors for diabetes. In urban areas, most emissions come from vehicles and industry, whereas in rural areas, much of the pollution stems from biomass burning for cooking and keeping warm. In autumn and winter months, large scale crop residue burning in agriculture fields - a low cost alternative to mechanical tilling - is a major source of smoke, smog and particulate pollution. Air pollution increases the risk of heart diseases, causes allergies, bronchitis, asthma, contributes to the premature deaths of 2 million Indians every year, and is also responsible for causing mental health issues, including depression.

The air pollution epidemic is evident all over the globe; animals have reportedly died after ingesting fumes and breathing in toxic, polluted air. This World Environment Day, 2019, in India is being organized by Bhamla Foundation along with the Ministry of Environment and the United Nations Organization. With Beat Air Pollution as the theme of this year's event, India is coming together to improve air quality and protect human health. Bhamla Foundation, through its environment initiatives, is working towards curbing the menace of air pollution, keeping in line with the UNO initiative of 'Beat Air Pollution'. Following the #BeatPlasticPollution song, ideated by Asif Bhamla, his foundation has come up with, yet another anthem.

The #HawaAaneDe musical campaign was made a success by roping in many celebrities and influencers to carry out a message of air pollution threat, with Swanand Kirkire, Shaan and Rajkumar Rao making their presence felt among others. Asif Bhamla, through Bhamla Foundation, had earlier set the thought in motion among the masses with the sapling plantation drive and make and use the paper bag initiative at the hands of Sanjay Dutt.

Besides Asif Bhamla, Meraj Husain and Saher Bhamla of Bhamla Foundation, Yuva Sena Chief Aaditya Thackeray, Sonu Sood, Jackie Shroff, Shaan, Sophie Choudry, Manish Paul, Karanvir Bohra, Anu Malik, Shiamak Davar, Vivek Goenka, Zarina Wahab, Aditya Pancholi, Emiway Bantai, Madhur Bhandarkar, Milind Deora, Ashish Shelar, Sachin Bhau Ahir, Ashok Kapoor, Parmeet Sethi and Archana Puran Singh, Edgard Kagan (Consul Gen of USA), Alok Kumar Choudhary (of SBI), Swanand Kirkire and many others from the films, social, political and business fields lived up the amphitheatre at Carter road, Bandra, and joined in the celebrations. Master

of Ceremonies were Meraj Husain and Ruby Bhatia.

"We know how air pollution harms us, there is no excuse not to act. It threatens everyone from unborn babies to children walking to school, to women cooking over open fires. Remember, clean air is your right! Chal #HawaAaneDe," averred Akshay Kumar.

"Clean air is a basic human right. Together, let us pledge to make our lives and country pollution free. Chal #HawaAaneDe," said Vicky Kaushal. I am very proud to be associated with this initiative taken by the Ministry of Environment, United Nation, Bhamla Foundation and SBI on fighting air pollution. Clean air is what Nature has gifted us, and we've just made it worse," shared Rajkumar Rao, "It's high time we take it seriously." "Through the current year's UN environment motto, we wish to inform and educate, not just the youngsters, but everyone," imparted Shaan. "We can produce anything in this world, from a pin to a plane. What we do not have is an instrument to produce natural oxygen. Natural oxygen comes from green plants. It's time for all of us to be aggressive for more plantation of greenery," expressed Ashish Shelar, MLA - Bandra West. "Pollution is a hazard that the citizens of this country should really pay attention to. Small changes brought about by many of us will result in a very big change," added Shankar Mahadevan. Besides, Ayushmann Khurrana and Janhvi Kapoor have also recorded positive messages for Bhamla Foundation and the Ministry of Environment.

As the video rakes in more and more hits, the movement will gain momentum and awareness will spread among the masses. #HawaAaneDe song and the campaign were created by the Bhamla Foundation in association with the Ministry of Environment, United Nations Organization as well as the entire film fraternity. As you see, the peril is drawing closer and closer. It is not just an idea but a theoretical reality. Every warning about Global Warming is slowly getting true.

It is also reported that unless mankind makes drastic changes in the coming years, the permanent damage because of environmental pollution will become inevitable. Or as Asif Bhamla of Bhamla Foundation rightly put it, "I am glad that the Hon'ble Chief Minister of Maharashtra Shri Devendra Fadnavis, members of the entertainment fraternity, have come together with our Bhamla Foundation with a hope to make a lasting difference, so our sons and daughters can breathe air that won't harm them. This is the time now, to make a difference, before the very air we breathe, kills us!"

12 Techno NJR Faculties Certified NPTEL

Udaipur: Not only students but Faculties also do a certification at Techno India NJR in their respective fields through well-known organizations like NPTEL, Udacity.

Faculties along with their departments, badges, and Certifications:

- Nitin Kothari (ECE) - Gold Badge, Introduction to the Internet of Things
- Nishant Sharma (CE) - Gold Badge, Soil Mechanics / Geotechnical Engineering 1
- Jitendra Choubisa (CE) - Gold Badge, Introduction to Remote Sensing
- Kiran Acharya (CSE) - Silver Badge, Cloud Computing
- Yogendra Solanki (ECE) - Silver Badge, Embedded System Design using ARM
- Paras Kothari (CSE) - Silver Badge, Problem Solving Through Programming in C
- Vishnu Agarwal (ME) - Silver Badge, Steam & Gas Power Systems
- Vivek Jain (ECE) - Silver Badge, Microprocessors & Microcontrollers
- Sangeeta Choudhary (CE) - Geotechnical Engineering 2, Foundation Engineering
- Sangeeta Choudhary (CE) - Soil Mechanics / Geotechnical Engineering 1
- Vishnu Agarwal (ME) - Thermodynamics
- Rakesh Yadav (CE) - Subsurface Exploration: Importance & Techniques Involved

Temple Priest Sends Ramcharitmanas To Mamata

Varanasi: The head priest of a Varanasi temple has sent a copy of Shri Ramcharitmanas, a holy Hindu scripture, to Bengal Chief Minister Mamata Banerjee in a hope that it will purify her mind. During the election campaigning in May, the chief minister had a confrontation with the BJP supporters shouting Jai Shri Ram slogans. She had reportedly charged at them in fury, calling them "criminals" and "outsiders".

"Her buddhi (mind) might get purified by reading the Ramayana. She is after all those who chant Jai Shri Ram and this shows her mindset. Her hatred towards Ram will one day be the reason for her fall," Mahant Balak Das of Patalpuri Temple in Varanasi told news agency ANI.

"I have posted a copy of Shri Ramcharitmanas and requested her to read it as it is the only way out to change her mindset, know Lord Ram and purify her mind. I will keep sending her copies of Ramayana," the head priest added.

He also said that he is ready to guide her in understanding the Ramayana and has also sent her my mobile number along.
