

## Media should restore confidence among readers and viewers through reliable information - Tiwari

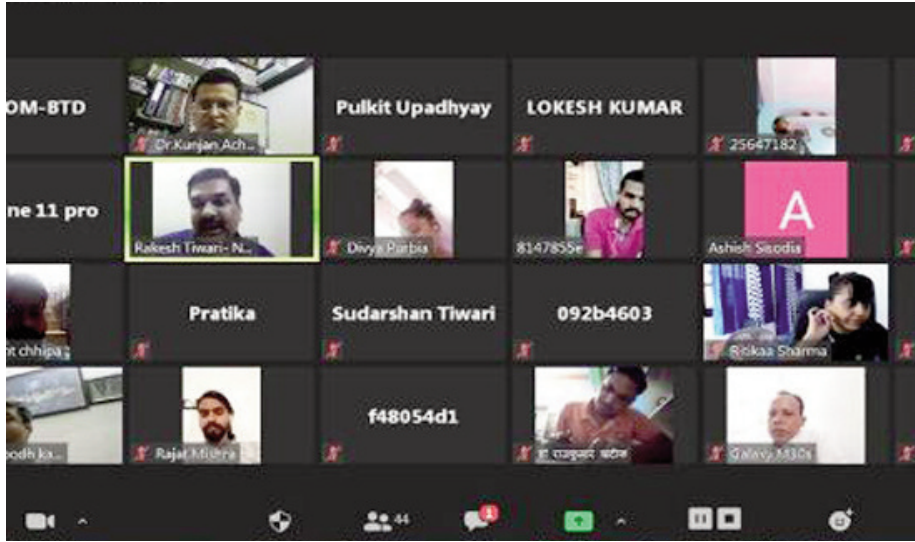

A two-day webinar by the Journalism and Mass Communication Department of Mohanlal Sukhadia University started NDTV New Delhi Senior Output Editor Rakesh Tiwari said In the inaugural session on Monday, in a webinar on "New Age of Journalism and challenges - Corona Era with Special Reference", that this era of epidemic created a crisis of confidence in readers and viewers.

This crisis is between the media and the public and between the center and the state, between other regulatory bodies and migrant laborers returning home. In such a situation, journalists should be alert and show the truth so that they are seen standing with the public, pain, and sorrow. He said that in this era of Corona, there is a glut of statistics. We are asked to rely

on government data, but as a journalist, we also have to find out the truth so that the reader and audience can reach reliable information.

He said that the journalist world is going through the most difficult phase because it is risking life and reporting in hotspot areas, on the other hand, in the economic crisis due to lack of advertisements, media institutions are facing the same pressure.

While presiding over the inaugural session, Prof. Sanjay Lodha, the founder of the College of Social Sciences and Humanities, said that media personnel's responsibility has increased in the era of 'Media Massification.' Many times the question arises that in the epidemic, the government is hiding the real data, in such a situation, media personnel should talk to researchers and scientists for the right content so that the

actual location can be revealed.

He said that migrant laborers are migrating to villages, so reporting rural areas and showing their condition is also very important. He said that social media is posing a big challenge in front of the tradi-

tional media; it will also have to be tightened to deal with it.

In the second session of the webinar, Naresh Dave, editor of ETV India, said that the role and acceptance of digital media have increased in the LockDown and Corona era. Whether it is in the form

of a digital edition of newspapers or visual news. The easy availability of the Internet has also made its way more comfortable. Everything is happening online, so even the future media will not remain untouched by it.

Dr. Manoj Lodha, the dean

of Haridev Joshi Journalism and Mass Communication University, told the need to turn original journalism to a rural magazine, he expressed concern that the laborers of the city have now shifted to the village, in such a situation, how are they Media workers should do the work of knowing the pain and conveying it to the government. Chandrasekhar of Delhi Doordarshan spoke on the need to build bridges between electronic media and digital media and the future of new media. Dr. Kunjan Acharya, Organizing Secretary and Convenor of the webinar and in charge of the Journalism and Mass Communication Department introduced the topic, explaining the concept of the webinar and introduced the guest speakers. The speakers also resolved the curiosity of the participants in the question-answering session.

## The message of environmental protection in online competition

**Udaipur:** The children of Rasiklal M. Dhariwal Public School conveyed the message of environmental protection to the public via online classes and made them aware of the Environment. Kumud Mukund, school principal, said that children who participated in this competition and through various activities showed their love for the Environment and also resolved to keep the Environment clean.

## Chief Minister apprises Rotary Mewar

**Udaipur:** The State Chief Minister Ashok Gehlot apprised of the service rendered under Covid-19 by Rotary Club Udaipur Mewar, Club President Chetan Prakash Jain said that he appreciated that Rotary Mewar was invited among the five representatives associated with service work in Udaipur district in the said meeting organized through state-level video conferencing. The Chief Minister was informed about the service work in the Udaipur district. Club patron Hansraj Chaudhary presented various problems related to tourism, the opening of offices in malls, and technical issues in Lockdown in Udaipur district. On this occasion, the Chief Minister resolved some problems quickly and, after studying some things, promised to solve them. Apart from Smart City CEO, representatives of four other social institutions were present in meeting. Chief Secretary, top officials including Medical Minister Raghu Sharma, were present.

## Young children of the tribal area planted 101 plants

**Udaipur:** Nature worship has particular importance in Indian culture. Children should be given these rites from now on to connect with the Environment, love it, and assume its responsibility to protect it. The Environment is the basis of the entire life, during the lockdown. There has been a lot of improvement, the Environment. All of us have to keep it clean now only then we can imagine a better life in the next time. The above idea is Dr. Shailendra Pandya, Member of Rajasthan State Child Rights Protection Commission, Government of Rajasthan expressed this in a webinar organized by Gayatri Seva Sansthan on the occasion of World Environment Day while addressing the online workers associated with the dialogue and the children of the education centers run by the institute.

Dr. Pandya exhorted the children to not only plant a sapling today but also take care of its lifelong conservation.

Giving information about the project coordinator of Gayatri Seva Sansthan, Nitin Paliwal said that in the online dialogue, field workers and children of Udaipur and Pratapgarh districts were connected through the Zoom webinar, after which everyone planted saplings at their homes with the inspiration of the Child Commission member. A total of 101 saplings were planted by the children in collaboration with the field workers. While giving the information, Project Officer Meenakshi Sharma said that everyone had been connected through online technology, keeping in mind the prevention of infection, and despite being in their place, the plantation program was completed with success. In the webinar, the field workers, including the experts of the institute, also expressed their views.

## Planting @GBH campus

**Udaipur:** On the World Environment Day, plantations were carried out on behalf of the management at GBH Group's GBH American Hospital and GBH General and Memorial Cancer Hospital campus in Bedwas. Given this, the institute handed over 700 face masks and 5-liter hand sanitizer to station superintendent Mukesh Joshi for the safety of passengers and employees. Vishnu Sharma 'Hitaishi', Bhagwan Prasad Gaur, and Anil Acharya of Media Division handed over the material.

## International webinar on the role of science and technology in the development of self-reliant India

### International webinar on the role of science and technology in the development of self-reliant India

**Udaipur:** In the present scenario, given the growing problem on the whole earth suffering from the global epidemic of Corona, under the joint aegis of the Faculty of Science of the Janardhanrai Nagar Rajasthan Vidyapeeth Deemed to Be University and the Indian Chemical Society Kolkata, a webinar was organized on "Science in the development of self-reliant India"

Presiding over webinar Vice-Chancellor Prof. SS Sarangdevot said that most countries are considering the source of this epi-

dem to China. Due to which they are ending their business relationship with China and are looking for other better options. In such a situation, India has a suitable opportunity to plan investment in India from many foreign countries, which will strengthen India's economy and provide employment opportunities to many people. In this challenging situation, Indian business people are being encouraged by various schemes under self-dependent India by the Government of India.

The keynote speaker of the webinar, Prof. Padma Shri GD Yadav was - Mumbai said that how scientists in India have an opportunity when they can strengthen India's identity global-

ly, they have to improve their technologies and make products that are of low cost with the best quality in the global market In such a situation, there is a need to research different areas of science technology simultaneously.

Distinguished guests from Bhavnagar, Dr. Nishith Desai, Prof. Suresh Ameta, Prof. DC Mukherjee also expressed his views. More than 700 participants in the webinar have also registered from abroad, including India. Dr. Rakshit Ameta did the faculty of Operations. Thank you, prof. Chittaranjan Sinha - Kolkata. Dr. Chandresh Chhatwani, & Dr did technical coordination Tarun Srimali.

## VISHNU KUMAR SUHALKA

Vishnu kumar Extremely modest and affable, Vishnu Kumar Suhalka is a renowned name in the construction sector in the city. Born in and a native of Lake City, Udaipur, Suhalka had his early schooling in St. Paul's School and later at Central School, Pratap Nagar.

He completed his B.Sc. (Mathematics) from M.B. College, Udaipur in 1982. To begin his career by joining his family which was into the sale of liquor but later switched to the construction sector. For some time, he was also a royalty collection contractor for the Mines Department. He also successfully ventured into the housing construction sector where his core belief remained a commitment to quality which he eventually delivered. A teetotaler and a practicing vegetarian, he strongly believes in the benefits of these practices. Impelled by his belief that education is a potent means of bringing about social change, Suhalka has recently launched Aadhar Career Classes, a coaching institute with the help of his son and daughter in law.

About the coaching scenario in Udaipur, he feels that now 80-90 percent of students go for it in Udaipur for two main reasons. Most teachers from several private schools are low paid while on the other hand, there is a mismatch between the salary and performance of govt. school teachers while they are required to be engaged in non-teaching activities. This has created a situation where teachers are either overworked or they are unable to produce academic outcomes. He also feels that parents have much higher expectations from coaching institutes where students spend 3-4 hours

a day than schools where they are for a longer period.

Much depends on parents, he believes, as it is their responsibility to make children disciplined. They can play a crucial role in protecting their children from time killers such as smartphones, TV, bike, money, and wrongful company. Preparing himself hard to teach Maths which is also one of his passion, Suhalka thinks that Maths makes one's brain logical while English also remains important in this global age. So also is good handwriting as it attracts the attention of the teacher and examiner. During school days, Suhalka participated actively in mental activities such as debates, sports, and workshops. He was under officer in NCC Army Wing and a Cadet in the Air Wing. His love for adventure once made him go to Chittorgarh on a bicycle and return the same day covering a distance of about 225 km.

He was also interested in Badminton (for which he still finds time from his busy schedule) and photography. Popularly known as Vishnuji Pedhwale, Suhalka's identity is now strongly associated with nature and trees. The 300 roadside trees he planted in Basant Bihar, Goverdhan Villas in the year 2000 are now up to 30ft tall and is a sight to behold. In addition to this, he has also contributed to the planting of hundreds of trees and donating tree guards in different parts of the town. No wonder, he received the 'Green Ideal Award' from the Governor of Rajasthan in 2013- the only person in the town to have got this.

His plants have won several prizes in the annual flower show organized by the Municipal Corporation at Gulab Bagh and Fatehsagar. His wonderlust took him to a month-long 'yatra' to the abode of Lord Shiva- Kailash Mansarovar in 2005. The parikrama of Mansarovar with a radius of 90km and mount Kailash with 57km, according to him is the holiest and toughest pilgrimage.

Realizing his social responsibilities Suhalka gifted 25 Sewing machines in the memory of his parents in 2007. He was an active President of Suhalka Samaj (2007-10) and has been instrumental in getting built one of the best community halls in the town and helps in organizing different kinds of social, religious, sports, and cultural activities.

He regularly provided scholarships to meritorious and needy students. An early riser, Suhalka is up at 5 in the morning and after a short Yoga session, it is time for him to go for a 55-minute walk to Goverdhan Sagar with his two neighbor friends whose company he immensely enjoys and values. He believes true and genuine friends are one of the biggest assets a person can ever possess.

Suhalka has two pet dogs. He likes singing and listening to old Hindi Bollywood songs and plays badminton with his grandson. He is fond of reading books especially on counseling, body language, and child psychology. Suhalka loves meeting people and is a good conversationalist whose talk is spiced with pithy and witty aphorisms culled from his own personal experience.

He believes that the good one does get good in return. One should always be generous and try never to be bitter. Mother Teresa is Suhalka's role model as he strongly believes in helping others in the best possible way. For him, Sewa (service) is parmo dharma (highest religion). The Suhalka's are an extremely close-knit family, very caring and loving of each other. They spend a lot of time together and go out to eat once a month just to enjoy themselves together. Suhalka's elder son Dipanshu manages the coaching institute Aadhaar in Udaipur where he also teaches English. His wife Meenu is a textile engineer, an MBA from Symbiosis University, Gold Medalist in hotel management, and has completed the Women Entrepreneurship Course at IIM Udaipur and manages Aadhar. They have a son named Praharsh. Suhalka's younger son Vinay is pursuing his Ph.D. at IIT Bombay. His wife Prithvi who has done her MSC Biochemistry from Vaddodara and later Women Entrepreneurship Program at IIM Udaipur is currently learning French in Mumbai. Kaveri is their daughter. Vishnu Kumar Suhalka feels very proud of the pivotal role his wife Umrao Devi has played in the success of her whole family. He feels that Udaipur is a highly livable place with its forests, lakes, good educational and medical facilities, and connectivity of every kind. With the improvement in traffic facilities and cleanliness, it can become an even bigger attraction.

For this, all the residents need to play an active role. Impelled by his passion to be socially helpful, persons who come in his contact become like him.

- ASHOK MATHUR

## 26 library furniture including 21 fabricated modern toilets for women

**Udaipur:** In a simple ceremony organized by Rotary Club Udaipur at Alok Sansthan, 26 libraries and 21 toilets (fabricated mobile toilet) were handed over to the representatives, principals of various government schools, and the social distance.

Club President Dr. Pradeep Kumawat said that the above service work was done with the efforts of Railway Energy Management. A library of 21 lakh rupees was given in government schools in which furniture, books, and toilet of 12 lakh rupees (mobile toilet) were given.

Dr. Kumawat told that Rotary Club Udaipur has so far gifted about 41 library libraries to government schools. All contemporary books have been presented to these schools, which are generally available in the markets at this time. He said that these books would not only benefit the students and students of the school but also for the common people of rural areas, books were added to it so that they too can benefit from it.

He said that around 525 (five hundred and fifty) books had been presented to each school, out of which some books have been given by Rotary Literacy Mission. In contrast, 370 books have been provided under the CSR Project of Railway Energy Management. Along with the library, seating furniture of the students and all facilities in which about 25 students can sit and use the library were provided.
