

India's Growth Story

74 long years, yes, that's how we have traveled since independence, and this has been a phenomenal journey. A few head-on wars, endless issues with our neighbors, and challenges to fight in every situation, we've had everything. And today, we can proudly say that we are a superpower in many fields. We are one of the few nations to have a presence in space, and we have been helping some superpowers in their growth too. Exceptional, and this is why the world sees us as a country with a difference.

Despite the population, we have improved the lives of our citizens. We are proudly the most significant democratic nation, and that is why we are doing that well. From a point where we were importing too many things, today, we are exporting to the world, and our quality and innovations are being talked everywhere.

From vehicles to software, India is leading the world in all fields. This has been possible because of freedom we have to express, work, and deliver

the way we want. Generations after generations have been better than their ancestors. This could be possible because the kids are given initial knowledge, and then they are allowed to find their paths. Every new generation takes the work done by the previous generation further and adds value to it.

But despite their aim to touch the sky, people keep the values of the culture and country intact. The level at which the festivals are celebrated across the country round the year is an epitome of how cultural values can and should be preserved. While the new generation takes the onus of carrying those ages-old values further, they have the sense to drop the blind faith in favor of the benefit of the society. While live-in is in fashion, still the values of the institution of marriage have not diminished at all. The country's growth can happen when the youth is focused and motivated. Children at an early age have dreams in their eyes and know the amount of work required to reach there. Parents also believe in the dreams of kids and do whatever best they can to ensure the kid pursues the path to their goal. The prudent mindset of parents ensures that the kids not only have good present, they also ensure that their future is secure. The idea of saving and supporting the kids is a strong reason why kids can freely focus on their dreams and worry nothing else. Every new year adds a new feather to India's cap. And this has been a continuous trend since our independence. This year too, we have had a number of notable improvements, additions in our lives. The need of the hour is to continue and never stop. India's diversity is one of the major powers that enable omnidirectional development.

The need is to grow and help others grow. When there is a sentiment of growth everywhere, quality of life improves in all sectors, and we get better from life. India's growth story has been impressive, and it will do more wonders in the coming years.

Online Education During Pandemic

Education is greatly diverse today in comparison to the 1950s because of advancements in teaching and other great inventions that provide easier techniques of teachings. One major issue that has been raised is distant learning.

Since the COVID-19 pandemic has disrupted the normal lifestyle of people across the globe, the virtual world has come to the rescue. Amongst many institutions schools have also shifted their base to virtual platforms to conduct classes online.

There are many reasons why online programs have become a popular form of distance learning in higher education today. The online environment offers unprecedented opportunities for people who would otherwise have limited access to education, as well as a new paradigm for educators in which dynamic courses of the highest quality can be developed.

Our reporter took an interview from the academic head of ALLEN Institute Jaipur Ashish Arora, asked about how online education works on day to day bases, he said, "courses are delivered by live lecture using video conferencing tools, which allows the students to download pre-recorded lecture and use message boards to discuss topics, teachers also engage with effective and interesting boosters to enhance the learning."

Teachers provide all lectures and materials to students". We also ask, can a student really earn online degrees in the hands on fields like nursing and engineering? He disagreed with this, that student can't earn online degree in these practical fields such as engineering and nursing, a student must usually meet additional face to face training requirements, fields like nursing, teaching, social work may be required to complete supervised fieldwork or clinical placements but do so through local school. In field such as engineering students can take classes online in a live format while gaining practical experience through strategic internships with employers across the state.

We also interacted with a school teacher of St. Teresa Sr. sec. school Jaipur. Aishwarya Nagarajan. We asked, is online education as effective as face to face instruction? she said online education may seem relatively new, but years of research says traditional coursework is more effective as students and teachers share personal attachment, which is less possible in online classes as due COVID-19 pandemic has disrupted the normal lifestyle of education, there is lots of burden too on teachers in online schedule, she also added as there is a monotonous way to sit in the class there is very less personal interaction, the child does not create his or her interest in online learning, to make online learning more interactive, they have lots of practical activities at home, that student could feel that they are indulging in intrapersonal activities, or else child will feel bored in online classes by sitting at one place and spend long hours in front of screens.

E learning requires strong self-motivation and time management skills, lack of self-motivation among students continues to be one of the primary reason why student fail to complete online courses. In traditional classrooms, there are numerous factors which constantly push students

towards their learning goals. Face-to-face communication with professors, peer-to-peer activities, and strict schedules all work in unison to keep the students from falling off track during their studies.

Building strong self-motivation and disciplinary skills is key to succeeding in an online learning environment. Additionally, face-to-face communication with professors can be substituted with online communication, and peer-to-peer activities should be promoted between online students similarly as it would be in traditional classrooms.

Peer-to-peer group activities and online lectures which require communication must be used even in an online learning environment. In doing so, we can ensure that E-Learning does not fail to teach students the communication skills necessary to succeed in real working environments.

Know More about - Siddharth Soni

Brimming with energy, young and dynamic Actor Siddharth Soni is well known for his philanthropy and acting talent. Impelled by his firm belief that the happiest people are those who lose them in the service of others. He entered the field of social service. The story of his generosity began one day, when he saw some rural school children shivering in winter without woollen clothes and footwear. Siddharth and his friends collected money and helped children by providing sweaters, shoes, stationary etc. Soon N.G.O named SIDDHAM SANSTHAN was formed. During their visits to rural schools the team tries to solve other different problems also like quality of mid-day meal, water and electricity supply and building. Parents are encouraged to send their children to school regularly. Private schools are enticed to donate old uniforms, clothes, books, bags etc. to be used by poor children. Free medical camps are also organized. The active team including Narendra Singh naruka, Bharat Borna, Karishma Soni, Abhijeet Singh, Gourav Verma, Misba Kadri, Harshwardhan Singh, Aditya Trigunayat Sharma, Pradhuman, Gajendra Singh and others give monthly donations. Crowdfunding is also being used to collect more money. Siddham Sansthan has also been playing an active role in the first against corona. A huge number of fresh food packets and raw materials packets were distributed among the needy.

For his cooperation with the police in several other ways, Siddharth has been honoured by several agencies. Son of renowned painter OM PRAKASH SONI BIJOLIYA, Siddharth Soni has chosen a different field to excel in. Being an actor is his childhood passion. He has already made a beginning with a short film. He is struggling hard and decided not to give up until he gets a lead role. He devotes four hours every day for social work and the remaining time for acting, fitness and family. No doubt with his zeal, commitment and determination, Actor Siddharth Soni is sure to reach the top in a short time.

#आत्मनिर्भरभारत #देशकीजरूरतोंकेलिए

आप सभी को स्वतंत्रता दिवस की हार्दिक शुभकामनाएं

आज़ादी के इस पर्व पर देश की आर्थिक मजबूती का संकल्प लें, आत्मनिर्भरता की ओर बढ़ें।
सोशल डिस्टेंसिंग एवं स्वच्छता का पालन कर कोरोना से मुक्ति पायें।
