Biggest infrastructure initiatives happening in the country

City Gas Distribution is probably one of the biggest infrastructure initiatives happening in the country and once the network comes out it would be a transformation on how energy is delivered in the country.

The domestic production of natural gas will also increase and we need to ensure to get the infrastructure in place, for that we need to lay distribution networks across the country needs to happen at a fast pace. Pipe network needs to reach every corner of the country.

In the future, the gas connection will be essential as an electric or internet connection. CNG vehicles are also going to increase exponentially and usage of Natural Gas is also going up. City Gas Distribution the focus needs to be on CGD and MSME sectors which are sectors from where the demand will be coming in the future. He also mentioned that there is a need for infrastructure and an increase in the pipeline network to fulfill the future demand. The other focus areas have been the easy availability of gas and infrastructure for other uses. He gave a detailed outlook about the steps undertaken by PNGRB to make the regulatory process simple and convenient to the consumer and industry so that the ultimate objective of 6% to 15% can be achieved soon.

CNG sector can benefit the country and state and central government needs to push for increasing its consumption especially in the transport sector. Looking at the reach and network of the gas pipeline, CGD contribution needs to increase. The economic value of using gas is much more in the transport sector as compared to other alternative fuels and that's something that needs to be one of the pivotal areas of focus for the industry as well the users. The usage of natural gas has increased a lot over the past decade. The government has played a strategic role in distributing the different fuels to meet different demands at the same time it has also played the role of a facilitator for the distribution of city gas. He emphasized that gas trading exchange needs to be an area of focus for the future.

Editorial

Vaccination can mitigate COVID-19 infection for Long-Term

New Delhi: Vaccination can mitigate COVID-19 for the long term and drive India towards being a Covid free Nation. We have become the world hub for vaccines and if we depend on the three vaccines, the estimate is that by July- August, we will have enough doses to inoculate majority of the citizens which will help curb the rapid spread of the virus in the country. Covishield and Covaxin are equally good for vaccination. The vaccine is not a cure but a protection against the disease and the severity of the disease is significantly lesser post vaccination mentioned Dr. Naresh Trehan, Chairman & Managing Director, Medanta - The Medicity Hospital in the Management Committee Meeting of PHD Chamber of Commerce and Industry for 2020-2021. Dr. Naresh Trehan opined that there will be severe post covid syndrome in many people who have recovered from the infection in the second wave. We are designing post covid rehabilitation program which will help strengthen the lungs and bring them back into healthy condition.

Imparting clinical knowledge about Mucormycosis, Dr. Naresh Trehan explained that the black fungus is always present in the atmosphere, it enters and attacks those who are immune-compromised, as their resistance to fight infection is affected. Those on threat are the patients who have been on prolonged use of high dose steroids and are diabetic, with sugar levels going high due to medication, are increasingly susceptible to this fungus attack. Some of the symptoms are a cold stuffy nose, tingling sensation on cheeks, and black spots in the oral cavity. It can be treated effectively if diagnosed at the earliest but if it spreads beyond the sinuses and enters the brain it can be deadly. It is advised that people with high steroid medication and diabetes be careful about examining themselves and should consult doctors in case any symptoms arise. While deliberating about the second wave, Dr. Trehan mentioned that the second wave is highly transmissible and we were aware that there will be a second wave, as expected. Not skewing the blame towards any single entity, Dr. Trehan mentioned that the Nation fell prey of the second wave due to the collective fault of all of us and it has indeed caused too much harm to the nation. The personal protection i.e. principles of covid appropriate behavior were not followed by the citizens along with the gatherings and continued celebrations of festivities which made this virus mutate and spread rapidly, leading to immense loss of lives, across the Nation. He mentioned that we tried to cope up with the oxygen supply and demand in the best possible way with the help of the industry. The staggered lockdown in North India has helped in breaking the chain, the numbers of new cases are on the decline but the demand for oxygen and other equipment is going up in South India, now. Talking about the 1st wave of the pandemic, he mentioned that the 1st wave was highly contagious. Indians very soon picked that masking, social distancing, and hand hygiene and also understood that we didn't have all the resources to take care of the pandemic but due to the National lockdown there was breakage in the chain of spread; helped repurpose the medical facilities and repurpose the industry to provide us vital types.

INDIAN ARMY DEDICATES 50 BED COVID FACILITY IN SRIGANGANAGAR

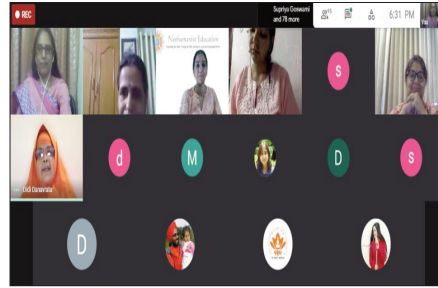

Jaipur: Indian Army's Sudarshan Chakra Division has extended a 50-bed hospital in Sriganaganagar, dedicated to the citizens to combat the rapid surge in the COVID-19 cases in the District.

The level 2 COVID-19 will provide COVID care including oxygen to the citizens of Sriganaganagar and adjoining areas. Indian Army Doctors and para medical staff have setup the facility with assistance of District Officials and Jan Sewa Hospital in record time. The Indian Army will provide dedicated medical staff and equipment to fight the pandemic. Ambulance services have also been provided for the patients by the Army. Admissions to the facility will be coordinated by District Medical Administration and Jan Sewa Hospital. The facility was inaugurated on 21 May 2021 by Mr Zakir Hussain, DM, Sriganaganagar and the Indian Army has assured all possible.

Microvitology- the unique contribution of Shrii P.R. Sarkar : Talk in Online Symposium organized by WWD

Women Welfare Department (WWD), Delhi Sector has organized an online symposium on Sunday, 23rd May through Google Meet to celebrate the Centennial Birth Anniversary of Shrii Shrii Anandamurti ji. The program was started with a Prabhat Samgiita in Sanskrit "Jay Shiva Svyambho " composed by Shrii P.R. Sarkar and garlanding and lamp lighting on the picture of Shrii P.R. Sarkar. Avtk. Anandaprabha Acharya welcomed all the participants and briefed that the symposium is planned to make people aware about the immense contributions of Shrii P.R. Sarkar for human society.

First speaker Mrs. Ritu from Bangalore talked about the concept of Neo-humanistic education and its need in the present situation. Mrs. Manjula from Shimoga, Karnataka gave details of Progressive Utilization Theory (PROUT) as given by Shrii Sarkar in a very simple and lucid manner. She emphasized that PROUT is the only solution to curb the problems raised by

Capitalism and Communism. The next speaker was Mrs. Prabha Agarwal from Mumbai who spoke on Awakening of women as thoughts of Shrii Sarkar who gave equal importance to the role of women in society and that is why founded WWD in 1965.

Dr. Vartika Jain, Asst. Prof. Govt. Meera Girls' College and Secretary, Society for Microvita Research and Integrated Medicine spoke on Microvita- the mysterious emanations of cosmic factor. She told that Microvita theory was

given by Shrii Sarkar in December 1986 which tells that all the viral diseases are in fact Negative Microvita Diseases and can be only cured by increasing concentration of Positive microvita in the surroundings by following 16 points, taking good sentient diet, reading good literature, chanting Kiirtan and doing meditation as also by planting plants of Panchwati in and around homes and hospitals. She explained that Microvita theory of Shrii Sarkar can solve many problems of society in a nicer way but it requires research in both physical and mental laboratories.

Then Ms. Tanvi talked about RAWA - the art for blessedness as given by Shrii Sarkar. Ms. Shruti Das spoke on Women's emancipation as they are equally titled to gain salvation. Last speaker was Tatvik Dr. Ashu from Jamshedpur who described the importance of Kaosikii - the psycho-spiritual dance propounded by Shrii Sarkar on 6th September, 1978. Kaosikii dance is able to cure 22 differ-

ent types of diseases and also reduces aging. She explained the effects of this dance on various body parts through a PPT.

In the end, Chief guest of the symposium Avtk. Ananda Danvarta Acharya, President, WWD inspired all the participants by her devotional experiences with Shrii Sarkar and said that it is only here where the women can also perform the shraadh and marriage ceremonies otherwise in no other religion, women have been given this right.

Avt. Ananda Chittaprabha Acharya, SWWS, gave the vote of thanks to speakers and participants and told that on the occasion of 100th Birthday of Shrii Shrii Anandamurti ji, WWD is organizing five days online program with various events including performances by RAWA artists and Katha Kiirtan by devotees. The event started at 4 pm and ended at 7 pm and attended by more than 150 participants from all over the country. It was moderated very well by Ms. Vijaya Kumari.

COVID19 "Oxygen Concentrator Machines" become 'life saving' – JASOLDHAM

Udaipur: In this second wave of Covid19 Pandemic, there has been a shortage of oxygen everywhere. Keeping this in mind, 15 "Oxygen Concentrator" machines have

been provided for Covid19 patients in the Government Nahata Hospital on behalf of Shrii Rani BhatiyaniMandirSansthan, Jasol. The Trust also made

available-5 "Multi Para Monitor machines, 15 Table Top Pulse Oximeters and 100 Oxygen Masks – for the Nahata Hospital. In the first wave of Covid19, the Temple Trust made a contribution of 21 lakhs in the Chief Minister's Relief Fund. Chairman RawalKishan Singh Jasol said that "In this global fight against wuhan-Covid19 pandemic, service of the suffering humanity is service in true sense." These "Oxygen Concentrators" will provide a lifeline for the Corona patients. He said that "In this

critical time of Corona crisis, helping each other should be the first priority for all. There is no religion greater than service of humanity", therefore, the Jasol Dham has decided to provide medical equipment for giving relief to the patients in Nahata Hospital. At this time of a global pandemic, the Temple Trust also appeals to other Donors and NGO's in the state to come forward in the interest of common good of humanity. He said that "it becomes the moral duty of every person to render help in some form or the other to

serve the needy." Shri NareshSoni, SDM said that "Shrii Rani BhatiyaniMandirSansthan, Jasol has always been working for the public at large and the needy. Nahata Hospital Covid19 in-charge Dr. Balraj Singh Panwar said that "At this time when efforts are being made on foot to save lives, it is commendable for Shrii Rani Bhatiyani Mandir Sansthan (Jasol Dham) to have provided lifesaving medical equipment at Nahata Hospital. The Temple Trust has also made available online

darshan facilities for all the devotees on the Trust website and social media platforms. During this period, the Secretary of the Trust, Th. Gajendra Singh, Management Committee Member Th. Fateh Singh, Nagar Parishad Chairman Sumitra Jain, Dr. Yashpal Singh Dakhia, Dr. G.R. Bhil, Sh. Lal Singh Asada, Mohanlal Panwar, Bajrang Singh, Bhopal Singh Malwa and other medical staff were present at Nahata Hospital while handing over the life saving medical equipment.

Consolidated Financial Results – Q4 & FY21

Shakti Pumps Records Highest Ever Quarterly and Yearly Profits till Date

Udaipur: Shakti Pumps (India) Limited has continued with its growth run in Q4 and FY21 displaying a fantastic performance. The company's total revenue in Q4 of 2020-21, between January and March, 2021 rose to Rs. 321.11 crore from Rs. 93.78 crore in Q4 FY20. The company also registered its highest ever Q4 EBITDA at Rs. 51.35 Crore as compared to a Rs. (1.41) crore in Q4FY20. The company also reported its highest ever quarterly profit. In Q4 FY21, the company made a net profit of Rs. 30.50 crore, as compared to a Rs. 6.15 crore loss in Q4FY20. For the year 2020-21, the company's revenue from operations stood at Rs. 933.43 crore, as compared to Rs. 386.91 crore in FY20. Similarly, EBITDA for 2020-21 stood at Rs. 145.82 crore, as compared to Rs. 16.33 crore in FY20. During this period, the company made a net profit of Rs. 75.59 crore, as compared to Rs. 14.08 crore loss in FY20. Commenting on the Results, Mr. Dinesh Patidar, Chairman and Managing Director said that, "We are glad to declare good financial performance, on account of robust growth in our domestic solar pumps market. The PM-KUSUM scheme has contributed to our growth during the financial year. The scheme has great potential as diesel pumps are unviable for farmers and electric pumps have limitations. We expect to supply more pumps under the scheme. He further added that, "PM-KUSUM scheme is doing well as in the first year of the implementation, 50,000 solar agricultural pumps were installed across the country against a target of 1.80 lakh set for the 2020-21 fiscal. We had installed 15,000 solar pumps under the scheme. We are expecting more demand during the current financial year and going forward as awareness increases among farmers. For the second year, the government target is 3.20Lakh agriculture solar pumps, which is where we see our growth coming from during the current financial year too." He further added that, the company has recommended a dividend of Rs. 8/- per share on a face value of Rs. 10/- per share which is 80%."

Donation of one crore rupees to CMRF by RTU

Kota: In view of the high speed of the sec-

ond dangerous infection of the global pandemic Covid-19, continuous efforts are being made by the Rajasthan Technical University Kota for its effective control and prevention. In the series of these efforts, under the direction of the Honorable Minister of Technical Education, Dr. Subhash Garg, the Vice-Chancellor of Rajasthan Technical University, Kota Prof. R.A. Gupta decided to give a donation of Rs one crore to the Chief Minister Relief Fund by the University Finance Committee to provide financial assistance to the Government of Rajasthan to fight the epidemic, playing a leading role in social services.

Accordingly, a draft/cheque of one crore amount was prepared and deposited in the Chief Minister's Assistance Fund to Dr. Subhash Garg, the Minister of Technical Education of the State, Dr. DK K. Palwalia is assigned by Dean Academic Affairs and Dr. Deepak Bhatia Assistant Professor on Thursday, 20 May 2021 at his residence in Jaipur. Honorable Minister of Technical Education, Dr. Subhash Garg, for this innovative initiative, has made the University to be a leader in social services. R.A. Gupta Heartfelt greetings have been sent to the entire university family. Also, made aware that Rajasthan is the first model in the entire country where better management has been done to stop the corona epidemic.

On this occasion, Prof. RA Gupta said that the Rajasthan Technical University quota has played its role from time to time for discharging social responsibilities. In order to provide relief to the common people suffering from the corona epidemic, Medical College Kota has been helped by purchasing 50 oxygen concentrators and one crore rupees medical college quota will be provided for necessary medical equipment, medicines, and beds, etc. and further assistance by the University. It will be possible that it can be done as necessary. Vice-Chancellor Prof. R.A. Gupta It has been conveyed by that all these efforts have been done under the direction of Honorable Chief Minister of the state Mr. Ashok Gehlot Ji and Dr. Subhash Garg, Honorable Minister of Technical Education of the state. This gave the university more opportunities to work in the social sector. It is expected that the state of Rajasthan will soon take the lead in controlling this epidemic. Heartfelt thanks were conveyed by Prof. Gupta to all the university families associated with this work. It is known that Rajasthan Technical University, Kota by the said amount of 1 crore has been provided through its internal sources, which will be used for effective prevention of this epidemic. Vice-Chancellor Prof. Gupta in this dire situation prevailing all over the state. Gupta has given exemplary examples through his Social responsibility.

VingaJoy Heavy Bass Wireless Headphones Launched in India, Priced at Rs. 2,999

The biggest benefit of this wireless headphones is that it has a lightweight structure and foldable design, making it a great companion while commuting. It also offers painless wearing for an easy comfortable long hour usage.

Commenting on the launch, Mr. Lalit Arora, Co-Founder, VingaJoy said, "VingaJoy has been at the forefront of innovation and has evolved into developing some of the finest audio peripherals in the market right now. We have always been fascinated by sound and wanted to make the music experience better by discovering new technologies. We developed Smart Sound - audio that automatically adapts to the surroundings, to ensure our consumers get a consistent and superior experience of voice, audio and music in every environment. Aligned with that, the VingaJoy BT-5800 is a revolutionary headset that will change the way we experience sound and cope with noise in the future. We strongly believe that the product will have a strong appeal to our customers."

N.I.C. and I.I.T. Chennai have created an IRED app

Udaipur: National Informatics Center (N.I.C.), and I.I.T. Chennai have jointly designed an app to prepare a database of every road accident occurring in the district and the reason behind the accident and the strategy to prevent future accidents. This app is named IRED (Integrated Road Accident Database). It is a matter of pride for Udaipur district that Udaipur has topped the entire state in terms of entry on the IRED (Integrated Road Accident Database) app. Stations of Udaipur district have recorded 188 accidents so far, which is the highest in the state. The use of this app has reduced road accidents in Tamil Nadu by about

30%. Savana Police Station Most Active From March 15 2021, this app is being used as a pilot project in all districts of Rajasthan. Savana Thana of Udaipur has made the most entry on the IRED app so far. All the police officers of the district and I.O.'s mobile have this app installed. Every accident has an entry. Information on every road accident is uploaded on the IRED app, along with the cause and photo. Jitendra Kumar Verma, senior technical director of N.I.C. of Udaipur district, said that every accident occurring in the district on the app is duly entered. Earlier, he could be entered on the app till the 15th day of the accident, but now the period has been extended to 75 days due to the busyness of the police. Road accidents will be controlled. Lucky Mittal, roll out the manager of IRED App, said that knowing the causes of accidents and reducing them and policymaking so that basic improvement can be made is the primary objective of the IRED project. The police administration has also appreciated this innovation. Even in this difficult time of Corona, the entries of every accident occurring in the district by Udaipur police is being done in a red app in a time-bound manner. The District Nodal Officer of the project, Ratan Kumar Chawla, Deputy Superintendent of Traffic, has instructed all the police officers to ensure the entry of all accidents in the IRED app.

J.I.T.O. Launches First Free Covid Isolation Center by Udaipur

Udaipur: J.I.T.O. Udaipur opened an accessible Covid Isolation Center at the Orbit Hotel in Shastri Circle on Saturday. In this, doctors, nurses, and other service providers will be available free of cost at all times, along with the stay, food, and drinking.
