

THE GRAPH OF ORGANIC AGRICULTURE WILL INCREASE WITH TECHNICAL AWARENESS AMONG FARMERS AND CUSTOMERS - DR. RATHORE

Udaipur: All India Organic Farming Network Project, Maharana Pratap University of Agriculture and Technology, Udaipur, organized a public awareness campaign on organic farming sponsored by the Indian Council of Agricultural Research, Indian Institute of Crop System, Modipuram, New Delhi. Dr. N. Ravi Shankar, National Coordinator Organic Farming Network Project, Modipuram (U.P.), said that about 1850 participants participated in this program.

Dr. Ravi Shankar said that the event was organized as a commemoration to complete 75 years of India's independence, with the primary objective of bringing new technologies developed by research in organic farming to the farmers and producers. To carry out research and dissemination in the field of organic agriculture in the country, work is being done by 20 network projects in the country.

Chief Guest Dr. Narendra

Singh Rathore, V.C. Maharana Pratap University of Agriculture and Technology, Udaipur, said that organic, natural, and cow-based agriculture is increasing in the country. But still, only 2 percent of the total net agricultural area of the country is in certified organic agriculture, which shows that awareness of organic farming among farmers and the public is deficient. He informed that since the year 2005, organic agriculture is being promoted in the country through the National Organic Production Program. But the yield reduction, lack of complete knowledge of bio-inputs, lack of supporting resources, marketing, and high cost and certification of certified organic foods should be known to farmers, customers, and policymakers.

Dr. Rathore said a need to provide complete information about organic foods to farmers and customers through digital media. The dwindling number of micro-organisms and carbon in the soil is a mat-

ter of concern to farmers. He stresses the need for particular importance of the nitrogen economy in organic agriculture. He informed that certified organic agriculture would be done in a one-hectare area on the farm of each research and agricultural science center of the university. He said that organic agriculture could play an essential role in the conservation of biodiversity.

Along with food security, it is necessary for nutritional security and environmental protection. He called upon the Center's scientists to do intensive technical brainstorming on every component and component with organic growers beyond every element and dimension of organic agricul-

ture so that the interested farmer can get a thorough knowledge of the pleasing and practical aspects of organic farming.

Dr. Suryanarayan Bhaskar, Deputy Director General (Natural Resource Management), Indian Council of Agricultural Research, New Delhi, said that Rajasthan has the lowest fertilizer and pest-tolerant use state. Therefore, in terms of export, organic farmers have a lot of opportunities in Rajasthan. Pesticide-free foods are increasing in the country. Thus, for group farming, organic farming should be adopted through group certification. Dr. Piyush Poonia, Executive Director, Indian Institute of Agricultural Systems, Modipuram, stated that many technologies had been developed in the country since 2004 to promote organic agriculture as an alternative farming method at the national level. It is the priority of the Indian Council of Agricultural Research, New

Delhi to extend all these technologies to villages.

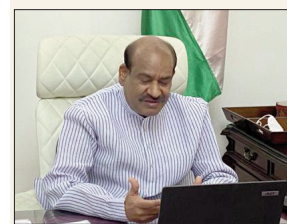

Dr. SK Sharma, Director Research and Project In-charge, Organic Farming, informed about the university's ongoing organic farming research and dissemination techniques. Dr. Sharma said that the university has organic farming packages of 13 crops of the state, production methods of 20 organic inputs, indigenous practices of organic farming, use of organic poultry and silica of organic agriculture, organic agricultural research under the National Agricultural Development Scheme, and about 80,000 More than farmers, broadcasters, scientists and students informed about the technologies developed by the Center.

Dr. Sharma said that Rajasthan has particular importance in terms of organic farming. Rajasthan is second in the country in terms of natural area. The first place in Madhya Pradesh. 36.7 lakh hectares

of area in India are certified organic agriculture (23 lakh hectares of cultivated \$ 13.7 lakh hectares of wild areas). At the same time, Rajasthan has 5th place in organic production. About 17 percent of India's organic farming area is in Rajasthan. But Rajasthan has only a 5 percent share in organic production in India. India's organic production is 27.5 lakh tonnes. At the same time, the organic production of Rajasthan is 1.32 lakh tonnes. The export of organic products from India is about 6.32 lakh tonnes, worth 4686 crores. In comparison, 23169 tonnes of organic products have been exported from Rajasthan, worth 138 crores, which is only about 3 percent. India's export of organic foods was 7078 crore (1.04 billion dollars) in 2020-21, which was 51 percent more than in 2019-20 (4686 crores) organic products are exported to 58 countries in India. Therefore, the farmers of Rajasthan should focus on the export of organic products.

Lok Sabha Speaker Birla interacted with corona warrior soldiers

Kota: Lok Sabha Speaker Om Birla said that all people should get the vaccination done as soon as possible. The mask is the vaccine until it is vaccinated. Apply all double masks and inspire others to apply as well. Lok Sabha Speaker Om Birla said this on Monday while speaking to health corona warriors of Tathed, Mandana, Deoli, Sangod, and Etawah of Sangod and Ladpura region.

Lok Sabha Speaker Birla said that health and education are necessary for everyone. Health Corona Warrior soldiers also have to keep everyone healthy in rural areas and educate and make them aware of the Covid Guidelines. People will be vigilant and alert. Only

then will we be able to break the corona chain. We have to make collective efforts to ensure that our villages are free from corona infection. If someone is infected, they have to help in recovery.

Birla appreciated the work being done by the Health Corona Warrior soldiers in the village of Kota-Bundi parliamentary constituency. He said that by taking care of the healthy corona warrior soldiers, the villagers had found a reliable partner who is ready to help them every step of the way. He said that the health corona warrior's soldiers would be trained and trained in the skill development department in the coming time. They will also be given a medical kit through which they will carry out routine tests in the villages. Start medicines as soon as you have a fever.

During the interaction, senior doctors Dr. KK Pareek and Dr. Sachin Bhola gave general information about covid to Health Corona Warrior soldiers. He said that at this time, Corona has an influence on the whole world. In such a situation, treatment of covid should be started as soon as the person gets a fever. Do not wait for the test report to come out for this. If the time is lost waiting for the RTPCR report, then the patient's health may deteriorate. He said that not all people should wear double masks and use surgical masks for more than a day. If you use the same mask for several days, then there is a risk of many other infections. He also answered questions from health Corona warrior soldiers.

Medical experts giving free consultation

Udaipur: Inside this terrible epidemic of Corona, where the whole world and our country are fighting this epidemic. In this sequence, "Free" counseling is being run by the Muskan Foundation, and hundreds of people are getting free consultation of Corona and common diseases daily.

Deepak Joshi of Muskan Foundation said that a particular team is doing teleconsult every day. At home during the Corona period, the general illness should be guided for the benefit of common people. The doctors are giving free medical services through WhatsApp and phone calls as scheduled and doing their hospital duty during this corona period.

This campaign has been launched to provide timely accessible counseling to the general public; many leading doctors are offering their services, including Gynecologist Dr. Bhamini Jakhetiya of Geetanjali Hospital Udaipur, Dr. Ankit Agarwal Oncologist, Dr. Partha Vaghela Cardio Thoracic and Vascular Surgeon, Dr. Maya Damor Anesthetist, R.N.T. Pediatrician and Pediatrician Dr. Neetu Beniwal, Dr. Alpesh Kothari, General and Laparoscopic Surgeon, Urologist Dr. Ananta Medical College Dr. Vikas Gupta Dr. Dashrath Singh Rathore, Homeopathic Specialist Dr. Meenakshi Shriwas, Dr. Vineet Shukla, Ayurveda expert Dr. Paramjit Singh.

Lakshraj Singh Mewar sets an example by presenting hi-tech ambulances to the Indian Army

Udaipur: All the public service activities, including the support of patients, financially weak people, continue in this era of the corona epidemic by Lakshraj Singh Mewar, former Mewar royal family member and Maharana Pratap Memorial Committee President. Lakshraj Singh Mewar has set an example by presenting a high-tech ambulance worth about 22 lakh rupees to the Indian Army. Lakshraj Singh presented this new ambulance to Brigadier Shekhar of Eklinggarh Cantonment, Udaipur, so that the Army can use this ambulance to treat severe patients suffering from other diseases, including corona victims.

Lakshraj Singh says that in this second wave of the corona epidemic, the Army has done a commendable job at the grassroots level to rescue and treat the people across the country. Significantly, Mewar royal family member Lakshraj Singh Mewar has been continuously engaged in public service activities since the first wave of Corona. Udaipur has also presented lakhs of rupees to the district administration so that the district administration can help the needy. The team of Mewar is ready to help the financially weak people in every village.

More than 37 thousand 769 people consumed decoction

Udaipur: Gayush Amrit distribution work is going on in the State Model Ayurveda dispensary Sindhi market during the second wave of global epidemic Covid-19.

Senior Ayurveda medical officer Vaidya Shobhalal Audichya said that following the guidelines issued by the Rajasthan government in the dispensary premises, so far, more than 37 thousand 769 people have benefited from Ayush Amrit Kwath and along with other states beneficiaries in the covid helpline consultation. More than 1235 individuals have been consulted for health benefits. Dr. Audichya informed Jignesh Sharma, Dr. Rekha Padaliya, Narendra Singh Jhala, Sharda Jalora, Rajendra Jalora, Compounder Kanchan Damore, Gajendra Ameta, etc. are supporting in this service work and because of the increasing outbreak of Corona, Ayurvedic decoction distribution in the morning. The dispensary will continue on the campus from 11 am to 11 pm.

Ayurveda college of Udaipur prepared Ayu Kawach kit

Udaipur: Madan Mohan Malaviya Government Ayurveda Dispensary has designed for free distribution Ayu Kavach Kit for Covid-19 infected patients

College Principal Professor Mahesh Dixit said that for the Ayu kawach kit, registration would have to be done on mobile 6376867655 from 9 am to 1 pm. The Corona Ayu Kawach kit will be distributed according to the nature of the body. In case of home isolation, the Ayu Kawach kit will prove to be beneficial for mild and moderate symptoms covid-19 infected patients. After registration, this kit can be taken from Ayurveda College Hospital, Amba Mata, Moti Chauhatta Hospital, Anushandhan Shalla Hospital.

The Ayu Kawach kit consists mainly of Giloy Ghanwari, Mahasudarshan Ghan Vati, Ayush 64 Tablet, Ashwagandhadhi Kshir Pak, Nasal Drop, Karporadi Inhaler, Yashti Vibhata Kwath. Keeping in mind the nature of the patient, some different medicines have been arranged in the kit. In case of moderate Corona symptoms and exacerbation of symptoms like fever, cough, and the above kit, three special types of kits will be given, including the golden drug Nityodaya Ras, Purnachandra, Mahalaxmi Vilas Ras.

Four caravan chariots kicked off to be aware for 'no mask-no movement'

Udaipur: Four caravan chariots of No Mask-No Movement as Public Awareness Campaign to maintain the three-tier public discipline lockdown guidelines were flagged off by the District Collector and former MP Raghuvir Singh Meena on Monday. Posters of the campaign were released during the awareness campaign being conducted under the joint aegis of National Health Mission Jaipur Unit, Police Department, UNICEF, and P.C.C.R.C.A.S.

Giving information about the three-tier public discipline lockdown, District

Collector Deora appealed to the people to follow the guidelines and praised the campaign, saying that mask is the most effective way to be safe from diseases like covid-19. Former MP Meena, wishing the success of the effort being made by the campaign, taught the common people to avoid needlessly leaving the house. Gandhi Human Welfare Society Secretary Madan Nagda, social worker Mukesh Madhwani, UNICEF Child Protection Advisor Sindhu Binujit, and several representatives from the Police Department were present on occasion.

Convener of the campaign, Vipin Tiwari told that the four chariots of No Mask-No Movement Awareness Vehicle, in the markets, circles, wards, colonies of different areas of Udaipur city from May 24 to May 30 at 10 am to 6 pm.

Awareness chariot will be visited in these areas: Tiwari said that these awareness chariots would move in and around Surajpol, Jagdish Temple, City Palace, Ghantaghar, Collectorate, Silvatwadi, Hathipol, Borwadi, Bhoiwada, Municipal Corporation, Nadakhada, Nayapura, Shaktinagar, Fatehsagar, Pichola, Maharana Bhupal Hospital, Hathipol, Boharwadi, Sukhadia Circle, Panchavati, Bathera Colony, Keshav Nagar, Adarsh Nagar, Gayatri Nagar, Kumbhar's Bhatta, Dore Nagar, Rana Pratap Nagar, Transport Nagar, Uday Vihar, Shastri Nagar, Nakoda, Nagar, Ashok Vihar, Tagore Nagar, Janakpuri, Shiva Nagar, The people will be made aware by visiting areas such as Krishimandi, Hiranmagri, Prabhat Nagar, Gandhi Nagar, Shyam Nagar, Chitrakoot Colony, E.I.C. Hospital, etc.

U.C.C.I. signed MoU with Police Department

Udaipur: A bilateral MoU was signed between the Udaipur Chamber of Commerce and Industry and the Police Department. The MoU was signed by Superintendent of Police, Udaipur, Dr. Rajiv Pachar and U.C.C.I. President Mr. Komal Kothari. On this occasion, the Honorary Secretary General of U.C.C.I., Dr. Anshu Kothari, was also present.

Honorary General Secretary Dr. Anshu Kothari said that the second wave of the corona epidemic had spread rapidly in the Udaipur division. Oxygen concentrator machines are helpful in the treatment of corona-infected patients, considering the severe lack of oxygen because they can be easily used to make oxygen available to patients. Chairman Shri Komal Kothari informed that U.C.C.I. received a request from aSP Udaipur and Additional Superintendent of Police Shri Gopal Swarup Mewada to provide oxygen concentrator machines in the covid-19 Hospital being set up in the Police Lines. In this context, the U.C.C.I. believes that these machines are beneficial in treating Corona-infected patients in government hospitals. This step is desirable for the policemen considering the number of patients. On this basis, U.C.C.I. accepted the request of the Police Department to supply these machines with the capacity of 5 liters per minute in collaboration with its member organizations. U.C.C.I. has made available oxygen concentrator machines for government hospitals and rural health centers, which are being used to treat patients.

The U.C.C.I. will maintain these machines under the MoU.

Save Lakshadweep, Save India

Lakshadweep is a group of ten islands near Kerala in the Arabian Sea. This group of islands has never been in the discussion of people of the mainland India but for its beautiful landscape which attracted tourists from all over the world.

This part of India which is one parliamentary seat represented by Nationalist Congress Party has 97% Muslim population. It has the lowest crime rate and had been a green zone where no Covid-19 patient was found in the first wave. Usually, this has been administered by an officer of the Indian Administrative Service. Recently the Central Government appointed the home minister of Gujarat Praful Khoda Patel as its administrator. He was appointed with a design to disrupt the Union Territory with a majority Muslim population and introduce the agenda of the saffron brigade.

The economy of the group of islands relies on coconut plantations, fishing and tourism. The trade relations of Lakshadweep are with Kerala, Maldives and Middle East. The new administrator has tried to unsettle the appeacart by enforcing laws which destroy the economy of this Union territory.

Lakshadweep is a group of Coral islands which have been so far saved from excessive industrial activity. It has been conserved by UNESCO. There is an air base of military and a small port which is used for surveillance in the Arabian Sea.

The new Gujarati administrator has changed rules which have caused 367 cases of infection of COVID-19 and 22 deaths in 2021. All those people who protested against CAA and NRC have been arrested and Goonda Act has been introduced in a territory where it was just not needed. The fear is that it will be used to silence the opposition of Mod government. Beef slaughter house has been closed down and for any kind of trade of meat etc. prior permission will be required. This has been done in a place where 99% population is non-vegetarian.

The worst decision is that of closing down the port which connected the Union territory to Kerala which is a second home to the people of Lakshadweep. On the contrary it is made mandatory to use the port which connects it to Karnataka, a BJP ruled state. This has been done obviously to hurt the trade interests of Kerala.

Widespread protests have been raised against the Central government's alleged measures to upset the peaceful life of the people of Lakshadweep.

The Samajwadi Janata Party (SJP) and the Kerala Muslim Jamat on Monday demanded the recall of Lakshadweep Administrator Praful Khoda Patel as he introduced the measures that angered the island people.

SJP national general secretary Pradeep Gopalakrishnan accused Mr. Patel of deliberately trying to destroy the peaceful life in the Lakshadweep islands by implementing unconstitutional and anti-democratic policies. Describing the situation in Lakshadweep as "horrible", Mr. Gopalakrishnan said that the Administrator was acting in connivance with the Central government. A meeting of the Kerala Muslim Jamat Malappuram district committee said that Mr. Patel was trying to gag those criticising the government by slapping Goonda Act against them. The Muslim Jamat accused Mr. Patel of turning Lakshadweep into a COVID-19 hotspot. "It was a green zone with no COVID-19 case during the first wave. But the administration turned the island into a region with the highest test positivity rate by ignoring the concerns raised by the local people," said senior Islamic scholar Koottampara Abdurrahman Darimi, who presided over the meeting.

The Jamat demanded that people across the country rise against the hidden agenda of the Sangh Parivar to destroy the culture of Lakshadweep.

- Dr.H.S.Chandalia

Asha Mehta of Udaipur got first place

Udaipur: Online Interstate Singles (Drama) Competition "Nityanjali-2021" was organized on April 26, 2021, by Maha Jain Mahavir Jayanti to commemorate Mahavir Jayanti by Bharatiya Jain Organization (BJS) Marathwada Mumbai, B-Division. In which a total of 256 participants participated. The result of the competition was announced on May 19, 2021. In which Smt. Asha Suresh Singh Mehta of Udaipur got first place.

Rajkumar Gaur did a surprise inspection of the Government District Hospital

Shri Ganga Nagar: In our city, too, given the possibility of fear of falling on children, Ganganagar M.L.A. Rajkumar Gaur conducted a surprise inspection of the Government District Hospital on Monday.

He said that given the high probability of infection of children in the third wave of Corona, preparations had been started in Ganganagar, in which a separate children's covid ward has been made in the state hospital, which has the full provision of oxygen. Shri Gaur discussed with the doctors and emphasized making the system more organized.

M.L.A. SM.L.A. Rajkumar Gaur visited the district hospital and looked at the various arrangements. Mr. Gaur saw the civil work of the new oxygen plant and gave instructions to install the equipment for oxygen gas soon. He said that the sooner the new plant starts, the more benefit covid patients will get. Mr. Gaur also visited various wards of the hospital. Cleanliness, drinking water arrangements were seen in the hospital.

Shri Gaur said that as per the intention of Chief Minister Shri Ashok Gehlot, no shortage of equipment and resources would be allowed in medical institutions. The medical system will be strengthened by the amount of the Local M.L.A. Development Scheme. He said that along with the government, there would be full cooperation of common people and Bhamashahs, and there will be no shortage of any resources.

Corona's deceased dependents should get help to the in Rajasthan too - Joshi

Chittor: Many families have lost an essential member of their family during the Corona epidemic. In the time of this crisis, the government should help them financially. MP CP Joshi has made the above demand from the Government of Rajasthan.

MP Joshi has demanded Rs 2 lakh help from Chief Minister Ashok Gehlot to provide financial support to the family of the deceased from Corona in the corona epidemic. MP Joshi said that you are trying to relieve the public by various decisions in times of crisis. Similarly, by giving financial assistance, that family will get some relief and support in this sad hour.

The Madhya Pradesh government is also assisting the Corona-affected families whose families have been killed there on behalf of the government, so the Rajasthan government should also decide in this direction to get relief in this time of crisis.

Narayan Seva's Oxygen-Meal and Corona Kit Service Continues Continuously

Udaipur: In the second wave of Corona, the services of oxygen-to-home food and corona medicine kit delivery services of Udaipur residents are continued uninterrupted by the

Narayan Seva Sansthan. President Prashant Agarwal said that on Saturday, the seeker team gave 1052 food packs to the families of Corona-infected and handed over nine oxygen cylinders and 22 Corona medicine kits to treat the family members of the sick for free. He said that on the helpline number of the Sansthan, more than 150 calls and WhatsApp are coming every day to the help seekers. Various institute teams also carry out ambulance service, sanitation service, ration distribution, etc., with full service. It is noteworthy that apart from Udaipur, the institute is also running free services from April 17 in Meerut, Parbhani, Baroda, where thousands of people are benefiting daily.
