

Over Confidence

Gunjan was a great swimmer. He had won many prizes for swimming fast. None of his friends could beat him for a long period. One day, he went to a picnic with his friends. They reached by a river, had snacks and tea while enjoying beautiful scenes around. Then they sat at the bank of a river nearby and started to gossip. Villagers near by denied them to go into the water because little ahead the river was deep and muddy too. So all agreed except Gunjan. He decided to go into the water. All tried to stop him his friends as well as villagers but in vain. He wanted to show that he can go and come back swiftly and safely.

Suddenly, he found that his legs were stuck in the mud. He tried his best but he could not come up. Down in the water one can not shout also for help. He was throwing his hands and striving to come up. All at the bank were watching but nobody could dare to go into the water to save him, as it was very risky. By the time rescue team could arrive there, Gunjan had left the world.

Editorial

This was the result of his overconfidence which comes up because of ego inside. Ego means a false image of yourself what you are not. You think yourself to be, either in a lower state or in a higher state than you actually are. Both the situations are dangerous. Note down that Ego is the biggest mistake ever done by a human being. One can find everything in the world but not his own mistake. This gentle state raises its head because of the feeling of insecurity inside. Soby preserving ego, you feel yourself stronger than you are. A person erects a wall around him and feels safe inside that boundary. He thinks of a special image of him resting in people's hearts and he cannot just think of breaking that image because that image gives him strength, makes him feel more secure.

But alas, that all is false. You need to think yourself, if the so called image was true, there wouldnt have been any feeling of insecurity then. As the true image is itself sufficient to make you feel strong. No need to care about the world then. Otherwise also what people think about you is most of the times wrong because they judge you according to their own perspectives and thinking pattern and everybody's thinking pattern is different. So many people, many thinking patterns, many thinking attitudes where as your personality is one. So no need to worry too much. Be confident but not overconfident. Truth is always powerful. Reality is always strong.

So be bold enough to drop down that false image. Accept the reality whatever it is, face it courageously and start working on yourself to improve it. We are all human beings and everybody makes mistakes. As you know a politician stated once, "Every so called good person had a past and every so called bad person has a future." Remember always that you are a unique creation of The Almighty God. -Sulekha Shrivastava

Dr Aneel Kashi Murarka bestowed with Bihar Ratna Award

Bihar Film and Television Artists Association Trust (BFTAA) celebrated 110th year of Bihar Foundation Day (Bihar Divas) at the Indian Motion Picture Producers' Association (IMPPA) office, Mumbai at the hands of Educationist, Film Producer TP Aggarwal, action director Tinu Verma and Guinness Book Record holder actor Rajan Kumar.

Common Wealth Heavyweight Champion wrestler Sangram Singh is now questioning the host of the Lock Upp show and Bollywood actress Kangana Ranaut. In the recently released promo of the show, Kangana Ranaut had asked Payal to keep quiet. Payal Tried to reason but was rebuked by Kangana. The episode highlighted how Kangana was furious at Payal's leadership because according to her, Payal does not allow anyone else to speak.

Airtel showcases the exciting future of immersive video entertainment on 5G

Udaipur: Bharti Airtel ("Airtel"), India's premier communications solutions provider, today showcased 5G's high-speed, low latency capabilities to transform the future of video entertainment and take the user experience to the next level. Using cutting edge immersive video technologies over its high speed 5G test network, Airtel recreated the in-stadia experience of Kapil Dev's famous 175 not out vs Zimbabwe, during the 1983 Cricket World Cup. A special 175 Replayed video, in 4K mode, brought to key moments from the match to life, which had no video footage due to a strike by TV technicians. With speeds of over 1 Gbps and latency of under 20 ms, more than 50 concurrent users enjoyed a highly personalized

4K video experience of the match on 5G smartphones, with real-time access to multiple camera angles, 360-degree in-stadia view, shot analysis and stats. The session was made even more exciting with India's first 5G powered hologram interaction with Kapil Dev. The Airtel 5G powered virtual avatar of the legendary cricketer appeared on the stage, to interact with the fans in real-time and walk them through the key moments of his innings.

Randeep Sekhon, CTO, Bharti Airtel: "The gigabit speeds and millisecond latency of 5G will transform the way we consume entertainment. With today's demonstration, we have only scratched the surface of the infinite possibilities of 5G and highly personalized

immersive experiences in the digital world. With 5G based holograms, we will be able to transport virtual avatars to any location and this will be a game changer for meetings and conferences, LIVE news and will have so many other use cases.

Airtel is fully prepared for 5G in this emerging digital world and is building a solid pipeline of innovative use cases for India.

We also take this opportunity to thank the Department of Telecom for giving us the

trial spectrum, to validate our technology and use cases."

Describing his experience, Kapil Dev added: "I am simply amazed by the power of 5G technology and seeing my digital avatar interact with my fans as if I am actually there. Thank

you Airtel for this wonderful effort and bringing to life one of the most important innings of my career." Airtel conducted the demonstration at its Network Experience Center in Manesar (Gurgaon) using Ericsson 5G Radio in NSA and SA modes over 3500 MHz band test spectrum allotted by the Department of Telecom, Government of India.

Airtel is spearheading 5G in India. Earlier this year Airtel demonstrated India's first 5G experience over a live 4G network. It also demonstrated India's first rural 5G trial as well as the first cloud gaming experience on 5G. As part of #5GforBusiness, Airtel has joined forces with leading global consulting and technology companies and brands to test 5G based solutions.

Actress Nikkita Ghag stars in the horror-mystery short film 'Anandi'

Model, actress and DAWA Founder and President Nikkita Ghag, who has extensively fought for the rights of animals, always raising her voice for their welfare and their protection, will soon be seen in the short film Anandi in which Nikita will be seen playing the lead actress.

Nikkita's look with the red bindi on her forehead, traditional jewelry and a Bengali drape, speaks of the story of her character seeped in culture.

Anandi is a horror-mystery genre short film that highlights social issues. Anandi is a woman who teaches evildo-

ers a lesson in her own style. This is a 15-minute short film that has been shot in the beautiful city of Kolkata. It is a period film based on Bengali culture.

The director of the film is Partha Sarathi Manna whose two earlier Bengali feature films have been well received

by the audiences. His film Hope that came in the year 2019, has won awards at MAMI Film Festival. Apart from Nikkita Ghag, the film also stars Brijesh Singh Yadav, Chitrali Das and Satyahari Mondal. The film is being produced under the banner of Cinemawale Productions.

Kailash Kher live performance at Rcity

JAI BHEEM short video App successful content creators get rewarded to see Kailash Kher live in concert

Young music lovers and thousands of Kailash Kher witnessed the singing star perform live at the mid-day musical nights event that was held at Courtyard of R City in Ghatkopar on Friday, the 25th of March where the Padma Shri Kailash Kher and Kailasa performed live to the amusement of the spectators.

The associate sponsor of this event was JAI BHEEM Short Video App, whose dynamic CEO Girish Wankhede gleefully mentioned, "Singing plays a very important part in most of the Short Videos, and since out JAI BHEEM app is a Short Video App, a lot can be conveyed through songs and lyrics as has been the part of our rich India culture. Kailash Kher is a very big name and we are proud to be associated with his concert."

Kailash Kher added "I was overwhelmed with the response that all the tickets were sold within two days, people across cities were trying hard to get into the concert which I believe is a good sign. I'm glad and thankful to mid-day, Sachin Enterprises and Jai Bheem Short Video App for organizing such a grand and beautiful musical night. Audience was so loving and enthusiastic. I'm grateful and thankful to everyone. Looking forward to doing such grand live shows."

Engineering, Telecom and Healthcare will add close to 12 million

new jobs by FY'26 states

Mumbai: TeamLease Digital, the specialised staffing division of TeamLease Services today launched a comprehensive report covering the employment trends across Engineering, Telecom and Healthcare titled Professional Staffing – Digital Employment Trends Report. An in-depth report, it tables the hiring trends in the Engineering, Telecom & Healthcare sectors. It delves deep into specialised roles, the sought after skills, skill gap and measures undertaken to address the gap by employers, and market median salaries for these roles. It also throws light on the impact of technology proliferation and digitization on employment in the three sectors. According to the research, not only the contribution to GDP by Engineering, Telecom and Healthcare will see a rise in the next 5 years, even the job creation by the sector will grow significantly. The three sectors together is expected to add close to 12 million new jobs by FY'26. The total employment generated by the three sector together will rise from the current 4.56 million to 9.03 million in the next five years.

What more, the focus on recovery coupled with technology proliferation and digitization in these sectors will lead to an increase in demand for talent with high skill and expertise. The demand for specialized roles will double by 2026.

Motherson wins its first order

Mumbai: Motherson announced that it has won an order from Boeing to manufacture and supply aftermarket molded polymer parts for commercial airplane interiors. This is the first order for Motherson from Boeing. The order will commence from Q3 FY23 and will be produced in a Motherson plant situated in Noida, located in the state of Uttar Pradesh in India.

Motherson is scaling its capabilities to provide integrated solutions to the aerospace industry. With capabilities in aerospace ecosystem such as materials, aerostructures, wiring harnesses and global manufacturing footprint, Motherson has the necessary knowhow to support the upcoming ramp-up of production for major global aircraft manufacturers. This is in line with our growth strategy to strengthen non-automotive business as announced during our five-year plan, Vision 2025.

JK Tyre Sets Another Industry Benchmark, Introduces 'Puncture Guard Tyre'

Mumbai: Revolutionizing India's tyre market, the pioneer of Radial technology and leading tyre manufacturer, JK Tyre & Industries Ltd., has launched India's first Puncture Guard Tyres for four-wheelers.

Driven by the technological expertise of producing high-performance tyres suited for Indian conditions, JK Tyre, aims to revolutionize the industry with Puncture Guard Tyres for new generation cars available in the market.

The Puncture Guard tyre technology, with specially engineered self-healing elastomer inner coat, applied inside the tyres through an automated process, heals the punctures. Tyres with this technology can self-repair the multiple punctures in the tread area, due to nails or other sharp objects up to 6.0 mm diameter instantly. Puncture Guard tyre offers hassle free ride throughout the life of the tyre without air loss.

Commenting on the occasion, Dr. Raghupati Singhania, Chairman & Managing Director said, "JK Tyre has always been a front-runner when it comes to innovation-led technological development. With the introduction of Smart tyre technology in 2020 and now the Puncture Guard Tyre technology, we have yet again delivered on our commitment to provide advanced mobility solutions to our customers. This technology offers high level of safety and convenience to vehicle owners. The Puncture Guard tyre technology was part of the concept tyres unveiled at the Auto Expo 2020 and in line with JK Tyre's initiative to foray into breakthrough innovations this year."

To ensure safe rides, the advanced Puncture Guard tyre has been tested across all Indian on-road, as well as off-road conditions. The tyres are secure, unique and designed for optimal performance, drastically improving road safety while mitigating any potential accidents

Mahindra ties-up with Repos Energy

Udaipur: Mahindra's Truck and Bus Division (MTB), a part of the Mahindra Group, has associated with Repos Energy to cater to Doorstep Fuel delivery demand through Ready Made Fuel Bowser trucks. The Doorstep Fuel delivery model has grown rapidly across the country and scaled up even faster in the post-Covid era. This is due to a multitude of factors including, the global supply chain & economics of fuel trade, structural constraints of the existing distribution model, changing buying behavior of consumers and technological disruption. Mahindra FURIO offers guaranteed higher mileage and other product superiorities such as Compact vehicle architecture, Strong and Rugged Aggregates for greater vehicle reliability, Lower Turning Circle Diameter for Intracity driving Conditions and superior cabin comfort. The Standard front Anti-Roll Bar for better Vehicle Stability. iMAXX Intelligent Telematics Technology helps keep track of the vehicle from anywhere and makes transporting more efficient and profitable."
