

Why should we conserve rain water ?

Once upon a time, in a small village nestled in the lush green countryside, there lived a young girl named Maya. Maya had always been fascinated by the wonders of nature and had a deep appreciation for the Earth's precious resources. She had grown up hearing stories of the magnificent rainwater harvesting techniques used by her ancestors to sustain their village during droughts.

One sunny day, as Maya walked through her village, she noticed the village elders preparing for the upcoming World Earth Water Day. They were organizing a special event to raise awareness about the importance of rainwater conservation. Maya's eyes sparkled with excitement as she realized that this was her chance to contribute something meaningful to her community.

Inspired by her love for nature and the knowledge passed down through generations, Maya decided to create a unique story to engage and inspire her fellow villagers. She spent days crafting a magical tale that would capture their hearts and minds. On the eve of World Earth Water Day, the villagers gathered in the central square, eagerly awaiting Maya's storytelling. Maya stepped onto the stage, her voice filled with enthusiasm and wonder. She began her story, transporting everyone into a realm where raindrops were magical beings with a mission. In Maya's story, each raindrop possessed the power to bring life and sustenance to the Earth. They had the ability to nourish the soil, fill rivers and lakes, and recharge the precious groundwater. But these raindrops faced a great challenge—a wicked sorceress

named Evora, who sought to control all the rainwater for her selfish desires. As Maya spun her tale, she emphasized the importance of rainwater conservation and the devastating consequences of neglecting this natural resource. She explained how the reckless extraction of groundwater had caused water scarcity and put a strain on the environment. The villagers listened intently, realizing the significance of their actions in preserving the balance of nature. In her story, Maya introduced a young hero named Aiden, who embarked on a thrilling adventure to defeat the sorceress and restore the raindrops' power to the Earth. Aiden discovered that by implementing rainwater harvesting techniques, they could ensure a sustainable future for their village.

The villagers were captivated by the story, feeling a

sense of urgency and responsibility. They pledged to take action, promising to build rainwater harvesting systems in their homes and communities. They understood that by capturing rainwater, they could recharge the groundwater, alleviate water scarcity, and protect the environment for generations to come.

As Maya concluded her story, the villagers erupted in applause, their hearts filled with determination. They realized that by conserving rainwater, they were not only preserving a precious resource but also safeguarding their own well-being.

From that day forward, the village transformed into a beacon of rainwater conservation. Every rooftop was adorned with rainwater collection systems, and the once-dry wells brimmed with fresh, pure water. The village thrived, and neigh-

boring communities marveled at their success.

Maya's creative story had sparked a revolution of awareness and action. News of their achievements spread far and wide, inspiring other villages, towns, and even cities to follow suit. Rainwater conservation became a movement, empowering people to take control of their water sources and protect the Earth's most vital resource.

And so, Maya's story lived on, not only in the memories of her village but in the hearts of countless others who embraced the power of rainwater conservation. With each passing day, more communities joined the cause, celebrating World Earth Water Day not just as a reminder, but as a day of commitment—a commitment to protect and cherish every precious raindrop that fell from the sky.

BJP state president submitted suggestions through a letter

Chittorgarh: In the upcoming crop year 2023-24, the BJP state president and Chittorgarh MP C.P. Joshi has submitted suggestions through a letter in a meeting organized by the Narcotics Department in Kota for the proposed opium policy, aiming to provide more convenience to farmers and to address the issues of delayed licenses due to various reasons.

According to the spokesperson of the MP, Raghuv Sharma, the letter sent by MP C.P. Joshi for the upcoming opium policy stated that all types of contracts, whether they are below the average quality, have been cut, or have any other form of deterioration since 1998 until now, should be restored. The daily weighing should be discontinued because opium contains water when it is extracted. Over time, the water evaporates and reduces the weight of opium.

Farmers who are considered eligible for opium licenses should be informed in writing by the department about their eligibility for licenses. If a farmer does not want to cultivate the crop, it should be recorded in writing, and the responsibility for this should lie with the department. The weighing work should be completed within 45 days of opium cultivation.

For the farmers who received licenses in the previous year but could not sow the crop due to various reasons, they should also be given permission to cultivate the crop in the same year. Those who were given only a 1 kg concession earlier during 1998-2003 should have this concession increased. Farmers whose average yield has not been achieved for 5 consecutive years should be provided an annual average yield concession. The cases of opium cultivators whose crop was stolen before weighing and who filed a police complaint should be considered sympathetically, and they should also be provided an opportunity for opium cultivation. Licensed farmers who face water scarcity should be allowed to sow the crop in other villages.

For the farmers who were given new licenses in 1998-99 but could not sow the crop due to water scarcity, the department should provide them with licenses again, as per the information provided by the department. In the transfer of deceased farmers, apart from the legal heirs such as the spouse, sons, daughters, other legitimate successors mentioned in the application, such as adopted sons, daughters, grandchildren, or any other successor mentioned by the farmer, the process should be made easier to save farmers from unnecessary hassle.

The opium policy announcement should be made in the second week of September, and the distribution of licenses should be completed by the last week of September. In the process of opium license distribution, eligible farmers should be allowed to apply online. Along with this, strict action should be taken against irregularities in opium cultivation, and investigations should be conducted against all individuals involved, and appropriate action should be taken against them.

Police and excise department conducted a joint operation

Kota: Under the direction of SP Sharad Choudhary, the police and excise department conducted a joint operation, destroying a large quantity of illicit liquor.

The Kota SP, Sharad Choudhary (IPS), stated that they received information about illicit liquor production in the well of the Kalam village in the Ranpur police station area. They took this information seriously and, under the guidance of Additional Superintendent of Police Praveen Kumar Jain, a team led by Deputy Superintendent of Police Harshraj Singh Kherda, Deputy Superintendent of Police Dharma Veer Singh, Excise Department's Deputy Superintendent Atul Agarkar, and Thana In-charge Pushpendra Jhajharia from Anantpura, Anil Joshi from Arkepur, Manoj Kumar Sikarwar from Udyog Nagar, Mukesh from Gumanpura, and Babulal from Kotwali, along with Thana In-charge Rajesh Pathak from Dadabari and Thana In-charge Parmajit from Mahaveer Nagar, conducted a joint operation at the locations of illegal liquor production in Gram Kalam.

During the operation, the police and excise department formed joint teams and raided the Kalam village in the Ranpur police station area. Two individuals involved in the illicit liquor trade were arrested during this operation. They are Prabhu, son of Mangilal Jati Banjara, aged 36, residing in Kalam's well, and Raju, son of Mangilal Jati Banjara, aged 32, residing in Kalam's well.

A case was registered against them at the Ranpur police station in Kota City for producing illicit liquor, and a total of 50 litres of illicit liquor in handi pots was seized. Additionally, around 1500 litres of wash used in the production of illicit liquor were found stored in barrels at these locations, which were destroyed by the team by mixing them with soil. Furthermore, three charges were filed against the accused individuals producing illicit liquor at these locations. This operation was conducted under the supervision of SP Sharad Choudhary in the Kota district.

The two-day state conference of [CPI (M)] in Rajasthan concluded

Udaipur: The two-day state conference of the Communist Party of India (Marxist) [CPI(M)] in Rajasthan concluded. A 25-member state committee was elected during the conference. Comrade Shankarlal Chaudhary from Udaipur was elected as the new State Secretary.

A resolution was made to launch an extensive grassroots outreach campaign against communal fascist forces. The conference, held in Kumar Amand Hall, Jaipur, Rajasthan, discussed the political organizational report presented the previous day. Over 20 representatives expressed their views during the discussion.

It was emphasized during the discussion that there is a need for a comprehensive intellectual struggle to unite the people on their issues in order to effectively deal with the fascist BJP forces in the state. The Left ideology envisions a dream of India based on social-economic justice and religious harmony, founded on principles of equality, justice, and fraternity. It is important to effectively communicate this message to the general public during mass movements.

In response to the discussion, Shankarlal

masses.

To strengthen our political work's ideological aspect and strengthen the party organization, all representatives need to enhance their roles. While the people now understand the anti-people policies of the BJP-led central government, we also observe that the Congress-led state government has not fulfilled all their promises to the farmers. He provided detailed answers to questions raised by representatives, identifying the shortcomings of the party organization.

The state committee elections were held,

Chaudhary, on behalf of the present state committee, stated that there is a need to give a political direction to our people's work among the

and a new 25-member state committee was elected. In the first meeting of the state committee, Comrade Shankarlal Chaudhary was unanimously elected as the State Secretary.

Addressing the representatives, Comrade Sanjay Sharma, the supervisor of the conference appointed by the Central Committee and a member of the Polit Bureau, announced that the conference would adhere to the rules of the party constitution.

He emphasized the need to activate the party organization on the ground to counter the divisive politics of the RSS-BJP effectively.

Comrade Prabhat Chaudhary, a member of the Polit Bureau, stated that the conference took a resolution to unite with other left parties and democratic forces to defeat the BJP in the upcoming state assembly elections.

The elected state committee also conducted elections for a 9-member permanent committee, which includes Comrade Shankarlal Chaudhary from Udaipur, Comrade Farhat Bano, K.A. Chandradev Ola, and K.A. Sudha Chaudhary.

The Mysterious Disappearance of 38 Truck Trailers

In a shocking turn of events, 38 truck trailers loaded with valuable goods were reported missing, sparking a wave of concern among the authorities. The Royal Police quickly formed a team and dispatched them to Gujarat to investigate the matter.

Upon arrival, the Royal Police established contact with the local Gujarat Police and initiated an official investigation. The case was registered, and the inquiry began at the Royala Police Station. The area's police chief, Sunil Chaudhary, provided details of the incident.

According to the victims, the truck and trailer owners, a man named Ram Chandra Pandya, posing as a representative of Hindustan Zinc Limited, approached them with an offer to rent their vehicles. To secure the deal, Ram Chandra Pandya communicated with Kishan Lal Gadari, who facilitated the rental arrangements. However, it was Kishan Lal Gadari who ultimately took possession of the trucks and transported them to Rajkot, Gujarat, to sell them as scrap to Jamil Kabadi.

The truck owners were deceived, as their vehicles were fraudulently rented and subsequently disappeared. Reports of the 38 missing trailers reached the Royala Police Station, creating a sense of urgency within the police administration.

Several truck owners, who had recently discovered their trucks missing, arrived at the Royala Police Station to report the incidents. Led by Devi Lal Gurjar, they voiced their concerns and officially filed their reports. The police promptly registered a case against the individuals responsible for the fraudulent scheme of stealing trucks and trailers.

The victims explained that they became suspicious when they lost track of their rented vehicles for several days. Using GPS technology, they traced the location where the trucks had disappeared and found that the scrap dealers were dismantling the trucks into pieces.

Unbeknownst to the scrap dealers, their illicit activities had been exposed by the GPS trackers, making it easier for the police to follow their trail. The Royala Police Station remained in constant communication with the Gujarat Police, coordinating their efforts. A specialized team was formed and sent to Gujarat to aid in the investigation.

As the case progressed, the police gathered evidence and interviewed witnesses. The investigation aimed to uncover the entire network involved in this organized crime. The incident not only highlighted the importance of vigilance and security measures but also exposed the criminals' lack of foresight regarding modern tracking technology.

The Royala Police's determination, combined with the cooperation of the Gujarat Police, led to significant progress in the case. The investigation continued, and efforts were made to recover the stolen trucks and trailers, bringing those responsible to justice.

As the story unfolded, it served as a reminder to the public and law enforcement agencies about the need for increased security measures to combat such crimes effectively. The incident also emphasized the significance of technological advancements in assisting investigations and protecting valuable assets.

The investigation into the disappearance of the 38 truck trailers remains ongoing, as the authorities work diligently to bring closure to the victims and apprehend those responsible for this audacious crime.

Indradhanushi Srijan Ratna Program

Udaipur: On June 12, 2023, in the Bharatiya Lok Kala Mandal auditorium in Udaipur, the inaugural event of the special interview series titled "Indradhanushi Srijan Ratna Program" was held. The program commenced with an interview of Mayank Kumar Dolare Raya Raval, an eminent Vastu scientist, astrologer, artist, sculptor, author, storyteller, poet, and singer, conducted by the interviewee Dr. Shakuntala Sarupariya. The interview was organized to commemorate the late Padma Shri Devi Lal Samr's memory, with the joint participation of Kirati Shesh Patrakar, a cultural conservationist, and the Tanima Patra family.

During the interview program, Mayank Raval shared detailed insights into various aspects of his life. He began by mentioning that his childhood in Saurashtra was disciplined, and his interest in Vastu grew when he saw a large Vastu book in the library of a friend's father during his seventh grade. Although his original plan was to become a doctor, due to scoring slightly lower marks in the entrance exam, he ended up pursuing general engineering. However, he didn't find fulfillment in that field either, so he eventually enrolled in a college of Vastu and architecture. By combining the disciplines of Vastu and architecture, he became an influential Vastu scientist through his pursuit of knowledge and practice.

Mayank Raval further revealed that he had a deep passion for various art forms since childhood. He gained knowledge of

music and painting from his mother. He mentioned that he explored and expressed his creativity with meticulous research in every form of art throughout his life. He has written and sung over a hundred songs, published two books on Vastu, and continues to maintain his presence through television channels and YouTube. He described himself as someone who can transform into a river or a waterfall, adapting to the different roles and dimensions in his life. At the age of 57, he is currently studying in the second year of a music college.

When asked about maintaining balance and harmony in his busy schedule, Mayank Raval emphasized that he is not afraid of anyone, which he considers both a strength and weakness. He expressed his happiness when his work brings a smile to others' faces and mentioned his immense pride in his life achievements. He also conveyed a message that experiencing both happiness and difficulties in life allows one to gain profound insights. In order to escape the distortions brought by social media in modern times, he emphasized the importance of reconnecting with family, neighbors, and spending time with friends. He believed that embracing a lifestyle of togetherness and harmony with others is essential to preserve our happiness and peace, safeguarding it from the influence of social media.

Mayank Kumar Raval is a renowned Vastu consultant for influential saints, industrialists, and actors in India. He possesses expertise not only in Vastu but also in various other fields such as skilled poet, lyricist, choreographer, muralist, YouTuber, model, actor, teacher, painter, and astrologer. In the upcoming days, his songs will continue to resonate with audiences, and his multi-faceted talents will flourish in different dimensions of his artistic endeavours.

Mewar Cup Final Concluded Late Night

Hindustan Zinc, representing Udaipur, emerged victorious against the Mewar team from Bhilwara in the final match of the night football tournament, the Mewar Cup, held at the St. Anselm School Ground in Bhilwara. The event was organized from June 4th to June 9th. Sixteen teams from various districts of Rajasthan participated in this program. Several international and national players also took part in this state-level tournament.

With the support of the Jawahar Foundation, this football league match was organized for the first time in Bhilwara. The closing ceremony witnessed an exciting contest between the Mewar team from Bhilwara and the Hindustan Zinc team from Udaipur. Hindustan Zinc defeated the Bhilwara team with a score of 4-1.

Many dignitaries participated in the program. Vithal Shankar Avasthi (MLA) from Bhilwara, Ladoo Lal Teli (District President of BJP), Mahesh Soni (General Secretary of District Congress Committee), Hemendra Sharma (Block President of Congress in Bhilwara), Kailash Khatik (Secretary of Bhilwara Football Association), Rajnish Verma (In-charge, Jawahar Foundation and OSD LNJP Bhilwara Group), Chetan Mishra (Owner of Hindustan Zinc), Lokendra Pandya (Assistant Manager CSR RSWMB), Shailendra Chaudhary, and Chetan Sharma (Program Coordinator) were present at the occasion. Shankar Lal Jeengar, Secretary of the organizing committee, and Father Babu and Principal Father Steny from St. Aslam School expressed their gratitude to everyone for the successful event.
